SUPPLEMENTARY INFORMATION: The Allegheny National Forest Land and Resource Management Plan (Forest Plan) sets site-specific goals for the management of forest resources. The Martin Run Project includes portions of Management Area (MA) 3.0, which emphasizes timber harvesting as a means to make desired changes to forest vegetation and satisfy the public demand for wood products. The project area also includes portions of MA 6.1, which emphasizes providing habitat for wildlife, attractive scenery, and opportunities for semi-primitive motorized recreation. Finally, the project area includes portions of MA 8.0, which emphasizes protection of unique ecosystems for scientific purposes and dispersed recreation.

Preliminary Issues were identified based on past projects in the area (environmental assessments), issues developed for similar projects, and site-specific concerns raised by the resource specialists. These issues, listed below, will provide a framework that the Forest Service will use to analyze a range of alternatives, including No Action for the Project Area.

(1) *Road management*—The Martin Run project area contains a network of National Forest (NF) system, public, and private roads. The road system (in total) provides access for resource management, recreational opportunities for the public, access for private mineral owners, and forest research. Changes in the current National Forest road system will be supported by some people and opposed by others.

(2) *Old growth connectivity and its management*—Within the Martin Run project area, management conditions (*i.e.* Management Area designations) and on the ground investigations suggest managed old growth possibilities may center around connectivity on NF lands, riparian habitat, and social goals. The topic of old growth and its management has been an issue of previous concern within this project area and across the forest.

(3) *Even-Aged/Uneven-Aged Management*—Previous environmental analyses have shown that many members of the public have a strong interest in the silvicultural system used on National Forest lands. Forest Plan direction for the Martin Run Project area does not emphasize uneven-aged management. The Martin Run proposed action contains silvicultural prescriptions dominated by even-aged management with a few stands receiving uneven-aged prescriptions where favorable species composition prevails.

(4) *Tionesta Scenic and Research Natural Area (TSRNA)*—A recent Citizens' Wilderness Proposal (for review during forest plan revision) by the Friends of the Allegheny Wilderness includes seeking a wilderness designation for lands surrounding the TSRNA (approximately 14,960 acres in total). The proposed action for the Martin Run Project will continue with Forest Plan direction in this area.

Comment Requested: This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. Your comments will help the Forest Service refine and enhance the list of issues that are considered when analyzing alternatives to the proposed action. When this analysis is nearly complete, the Draft EIS will be filed with the Environmental Protection Agency and become available for public review (expected by October 2004). At that time the Environmental Protection Agency will publish a Notice of Availability of the document in the **Federal Register** (this will begin the 45-day comment period on the Draft EIS). After the comment period ends on the Draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement. The Final EIS is scheduled for release in March 2005.

Comments received, including names and addresses of those who comment, will be considered part of the public record and may be subject to public disclosure. Any person may request the Agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality.

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions

(*Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519 553 (1978)). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement stage may be waived or dismissed by the courts (*City of Angoon v. Hodel*, 803 F.2nd 1016, 1022 [9th Cir. 1986] and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980)).

Because of the above rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments are made available to the Forest Service at a time when they can be meaningfully considered and responded to in the final environmental impact statement. Comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages, sections, or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages, sections, or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to Council on Environmental Quality *Regulations for implementing the procedural provisions of the National Environmental Policy Act* at 40 CFR 1503.3 in addressing these points.

This decision will be subject to appeal under 36 CFR part 215. The responsible official is Nancy S. Larson, Deputy District Ranger, Bradford Ranger District, 29 Forest Service Way, Bradford, PA 16701.

NATURAL RESOURCES CONSERVATION SERVICE

Taylor Creek-Nubbin Slough Watershed, Okeechobee, Martin and St. Lucie Counties, FL

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of a finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR part 1500); and the Natural Resources Conservation Service Regulations (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an Environmental Impact Statement is not being prepared for the Taylor Creek-Nubbin Slough Watershed, Okeechobee, Martin and St. Lucie counties, Florida.

FOR FURTHER INFORMATION CONTACT: T. Niles Glasgow, State Conservationist, Natural Resources Conservation Service, P.O. Box 141510, Gainesville, FL 32614, (352) 338-9500.

SUPPLEMENTARY INFORMATION: The Environmental Assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Niles Glasgow, State Conservationist, has determined that the preparation and review of an Environmental Impact Statement is not needed for this project.

Proposed is the implementation of conservation practices on cow/calf farms and dairies in order to reduce phosphorus loads in the watershed and assist in achieving the Total Maximum Daily Load (TMDL) for Lake Okeechobee.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and other interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the Environmental Assessment are on file and may be reviewed by contacting Jessica Bertine, Agricultural Economist, Gainesville, FL, (352) 338-9513.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

T. Niles Glasgow,

State Conservationist.
