

funds among 51 EMAs based on a Congressionally mandated formula. The remaining funds are available on a competitive basis to those same EMAs that demonstrate severe need for supplemental assistance to combat the HIV epidemic, and an ability to disburse and use supplemental resources in a manner that is immediately responsive to the local epidemic and cost effective.

The CARE Act requires local planning councils to establish Title I priorities and allocate funds, taking into account critical factors. These include the: size and demographics of the local HIV epidemic; demonstrated (or probable) cost effectiveness and outcome effectiveness of proposed strategies and interventions; priorities of the communities with HIV disease for whom the services are intended; coordination of HIV care services delivery with HIV prevention programs and programs for the prevention and treatment of substance abuse; availability of other governmental and nongovernmental resources; and capacity development needs resulting from disparities in the availability of treatment and services in underserved communities. Other planning council duties include developing a comprehensive plan for the delivery of services and evaluating the effectiveness of administrative mechanisms used by the grantee to disburse (contract) the funds locally.

The *Title I Grant Application Supplements* have been designed to collect information from EMAs in a consistent, standard way when they apply for new or competing continuation grant funds in a combined formula and supplemental grant application. This information is needed to determine that funds are being used as intended by the Congress and in compliance with CARE Act mandates, and that supplemental funds are awarded to grantees on the basis of objective criteria consistent with CARE Act requirements. This includes requirements that grantees demonstrate: (a) Severity of need for emergency assistance to combat the HIV epidemic, including the unmet needs of persons who know their HIV status but are not yet in care, (Supplements 1, 4 and 5); (b) a functioning planning council that is in conformance with statutory membership requirements and carrying out mandated duties and responsibilities, (Supplement 2); (c) an ability to use Title I grant resources in a manner that is immediately responsive to the local epidemic and cost effective, and in compliance with payer of last resort, maintenance of effort and related requirements, (Supplements 3 and 6); and (d) a comprehensive plan for the delivery of HIV/AIDS care services that is responsive to the local epidemic and unmet needs, (Supplements 7 and 8).

In addition, HRSA uses the collected information as a benchmark for

monitoring grantee performance during the fiscal year; to identify individual and cross-cutting grantee technical assistance needs; and to detect emerging HIV/AIDS care services issues that may require changes in existing program policies or procedures.

The *Title I Application Supplements* will be transmitted by mail and electronically to all Title I EMAs and made available through the HRSA web site. Applicants will submit the Supplements electronically along with Form PHS-5161-1 (Revised 7/00), SF-424 and the program narrative portion of their application, using the Grants Management electronic transmission mechanisms established by HRSA. The Supplements will include check box responses; fields for reporting numeric fiscal and epidemiological data; and text boxes for describing other required information. The Supplements will automatically generate totals when appropriate, and have other automated fields to minimize the time required to insert identifying information.

The Supplements will require Title I applicants/grantees to report local epidemiological information and some fiscal and programmatic data collected from Title I funded contractors (sub-grantees), which grantees have been collecting and reporting since FY 1995 or earlier. The approximate response burden for applicants/grantees is estimated as:

Estimated number of grantee respondents	Estimated responses per grantee	Total number of responses	Hours per response	Estimated total hour burden
51 .....	1	51	16	816

**Agency Information Collection Activities: Proposed Collection; Comment Request**

In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of title 44, United States Code, as amended by the Paperwork Reduction Act of 1995, Public Law 104-13), the Health Resources and Services Administration (HRSA) publishes periodic summaries of proposed projects being developed for submission to the Office of Management and Budget under the Paperwork Reduction Act of 1995. To request more information on the

proposed project or to obtain a copy of the data collection plans and draft instruments, call the HRSA Reports Clearance Officer on (301) 443-1129.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

**Proposed Project: The National Health Service Corps Scholarship Program Deferment Request Forms and Associated Reporting Requirements (OMB No. 0915-0179)—Revision**

The National Health Service Corps (NHSC) Scholarship Program was established to assure an adequate supply of trained primary care health professionals (allopathic physicians, osteopathic physicians, dentists, nurse practitioners, nurse midwives, physician assistants, and, if needed by the NHSC program, other health professionals), to provide services in Health Professional Shortage Areas (HPSAs) throughout the United States. Under the Program, the Secretary has

entered into contracts with health professions students agreeing to pay the total school tuition, required fees and a stipend for living expenses. In exchange, the scholarship recipients agreed to provide full-time clinical services at a site in a federally designated HPSA.

To assure that scholars are adequately trained to provide primary health services to the underserved, individuals receiving a degree from a school of medicine (allopathic or osteopathic) are required by law to request a deferment of their service obligation to complete primary care postgraduate training (e.g., a residency) approved by the NHSC. Scholars in other disciplines (e.g., dentistry) may request a deferment of

their service obligation to pursue postgraduate training approved by the NHSC. The Deferment Request Form solicits information (including the period and type of training for which the deferment is requested), so that the NHSC is able to annually determine if a deferment will be approved. In special circumstances (e.g., switching residency programs, requesting a chief residency position, etc.), the scholar may also be asked to submit additional documentation (e.g., a letter from the new program director, a description of the chief residency position and how it would benefit the NHSC, etc.)

The estimated response burden is as follows:

Form	Number of respondents	Responses per respondent	Hours per response	Total hour burden
Deferment Request Forms .....	600	1	1	600
Letters of Intent and Request .....	100	1	1	100
Total .....	700	.....	.....	700

**Proposed Project: The National Health Service Corps Scholarship Program In-School Worksheets (OMB No. 0915-0250)—Revision**

The National Health Service Corps (NHSC) Scholarship Program was established to help alleviate the geographical maldistribution of physicians and other health practitioners in the United States. Under this program, health professions students are offered scholarships in return for future services in a federally-designated Health Professional Shortage Area. If awarded an NHSC scholarship, the program will require the scholar and the scholar's school to review and complete relevant data collection

worksheets for each year that the student is an NHSC scholar.

The *Data Sheet Form* requests that the NHSC scholar review the form for accuracy of pertinent information such as, social security number, contact information, current curriculum, and date of graduation. If scholars find the printed information to be accurate, they must sign the form and return it to the NHSC Scholarship Program in the envelope provided. If NHSC scholars find the information to be inaccurate, they are to make the necessary changes directly on the form. If the inaccurate information pertains to their curriculum or date of graduation, the scholars are also asked to include written supporting documentation from their schools.

The *Verification Sheet Form* is sent to the schools along with a list of the NHSC scholars that are enrolled at their school for the current academic year. The schools are asked to verify and/or correct the enrollment status of each of the scholars on the list, sign and date the form, and return it to the NHSC Scholarship Program in the envelope provided.

The *Contact Sheet Form* is sent to the schools and it requests the contact information of pertinent school officials. This information is used by the NHSC Scholarship Program for future contacts with the schools.

The estimated burden is as follows:
