

Section 9 of the Act. The preferred alternative would affect about 0.85 acre of occupied scrub-jay habitat. The Applicant's financial contribution to the Florida Scrub-jay Conservation Fund would provide funding to assist in the conservation of this species by assisting in land acquisition and/or habitat management.

The proposed action alternative is issuance of the Permit according to the HCP as submitted and described above. Under the proposed alternative, the effect of the proposed minimization and mitigation measures will be a contribution of funding for scrub-jay conservation. The contribution of mitigation funding will provide the Service opportunities to protect and manage other suitable habitat in southeastern Florida. Mitigation funding will likely be used in combination with other matching sources of money to target the purchase of larger tracts of habitat. As a result, the immediate acquisition of habitat with the mitigation funding provided by the Applicant is not anticipated. However, any future acquisition made with all or portions of this funding is expected to benefit scrub-jays since habitat protection and management has been identified as one of the most important conservation tasks for this species.

As stated above, the Service has made a preliminary determination that the issuance of the Permit is not a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of NEPA. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and HCP.

The Service will also evaluate whether the issuance of a section 10(a)(1)(B) Permit complies with Section 7 of the Act by conducting an intra-Service Section 7 consultation. The results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the Permit.
