

*Public Solicitation of New Information:*

We request any new information concerning the status of the northern spotted owl and marbled murrelet. New information is considered to be scientific and commercial data that has become available since the time of the species current listing determination or most recent status review. In particular, we are seeking information such as:

A. Species biology including, but not limited to, population trends, distribution, abundance, demographics, and genetics;

B. Habitat conditions including, but not limited to, amount, distribution, and suitability;

C. Conservation measures that have been implemented that benefit the species;

D. Threat status and trends (see five factors under heading "How do we determine whether a species is endangered or threatened?");

E. Other new information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Specifically for the owl and murrelet we are interested in new information, analyses, and/or reports for these species that summarize and interpret: demographic or population trends; genetics and competition; habitat amount, use, and distribution; and adequacy of existing regulatory mechanisms, management, and conservation planning. We request this information for all applicable land ownerships within the range of both species.

Information submitted should be supported by documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

**Conveyance of Mineral Interests in California**

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of segregation.

**SUMMARY:** The mineral interests owned by the United States in the land described in this notice, aggregating 160 acres, are segregated and made unavailable for filings under the general mining laws and the mineral leasing laws to determine the suitability for conveyance of the reserved mineral interest pursuant to section 209 of the Federal Land Policy and Management Act of October 21, 1976. The mineral interests may be conveyed in whole or in part upon favorable mineral examination. The purpose is to allow consolidation of surface and subsurface of minerals ownership where there are no known mineral values or in those instances where the reservation interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than the mineral development.
