

SUPPLEMENTARY INFORMATION: The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the regulations governing marine mammals (50 CFR part 18). Written data, comments, or requests for copies of the complete application or requests for a public hearing on this application should be submitted to the Director (address above). Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such a hearing is at the discretion of the Director.

Applicant: Darren A. Collins, Galena, KS, PRT-073836.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport hunted from the Lancaster Sound polar bear population in Canada for personal use.

The U.S. Fish and Wildlife Service has information collection approval from OMB through March 31, 2004, OMB Control Number 1018-0093. Federal Agencies may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a current valid OMB control number.

Dated: July 3, 2003.

Monica Farris,

Senior Permit Biologist, Branch of Permits, Division of Management Authority.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of the Final Restoration Plan and Environmental Assessment for the Lone Mountain Processing, Inc. Coal Slurry Spill Natural Resource Damage Assessment in Lee County, VA

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service), on behalf of the Department of the Interior (DOI), announces the release of the Final Restoration Plan and Environmental Assessment (RP/EA) for the Lone Mountain Processing, Inc. (LMPI) Coal Slurry Spill Natural Resource Damage Assessment in Lee County, Virginia. The RP/EA describes the trustee's plan to restore natural resources injured as a

result of a release of hazardous substances.

ADDRESSES: Requests for copies of the Final RP/EA may be made to: U.S. Fish and Wildlife Service, Virginia Field Office, 6669 Short Lane, Gloucester, Virginia 23061.

FOR FURTHER INFORMATION CONTACT: John Schmerfeld, U.S. Fish and Wildlife Service, 6669 Short Lane, Gloucester, Virginia 23061. Interested parties may also call 804-693-6694, extension 107, for further information.

SUPPLEMENTARY INFORMATION: On October 24, 1996, a failure in a coal slurry impoundment associated with a coal processing plant owned by LMPI in Lee County, Virginia, resulted in the release of six million gallons of coal slurry to the Powell River watershed. The spill occurred when subsidence in the coal slurry impoundment caused the coal slurry to enter a system of abandoned underground coal mine-works. The coal slurry exited through a mine-works surface portal at Gin Creek, causing the release of the coal slurry into a series of tributaries to the Powell River. "Blackwater," a mix of water, coal fines, and clay, and associated contaminants, extended far downstream. The coal slurry spill impacted fish, endangered freshwater mussels, other benthic organisms, supporting aquatic habitat, and designated critical habitat for two federally listed fish. Federally listed bats and migratory birds may have also been affected acutely due to a loss of a food supply, and chronically due to possible accumulation of contaminants through the food chain.

A Consent Decree (CD) was entered with the U.S. District Court for the Western District of Virginia, Big Stone Gap Division by the United States and LMPI on March 5, 2001, to address natural resource damages resulting from the 1996 release. The CD required that LMPI pay \$2,450,000 to the DOI Natural Resource Damage Assessment and Restoration Fund. The CD stipulates that these funds are to be "* * * utilized for reimbursement of past natural resource damage assessment costs, and restoration, replacement or acquisition of endangered and threatened fishes and mussels located in the Powell River and its watershed, or restoration, replacement or acquisition of their habitats or ecosystems which support them, or for restoration planning, implementation, oversight and monitoring."

Section 111(i) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) requires natural resource trustees to develop a

restoration plan prior to allocating recoveries to implement restoration actions, and to obtain public comment on that plan. Under the National Environmental Policy Act (NEPA), Federal agencies must identify and evaluate environmental impacts that may result from Federal actions. A Notice of Availability of the Draft RP/EA was published in the **Federal Register** on February 15, 2003, and a 30-day public comment period ended on March 15, 2003. Public comments were received and are addressed in the Final RP/EA. The Final RP/EA integrates CERCLA and NEPA requirements by summarizing the affected environment, describing the purpose and need for action, and selecting and describing the preferred restoration alternative.

Interested members of the public are invited to review the Final RP/EA. Copies of the Final RP/EA are available at the Service's Virginia Field Office in Gloucester, Virginia and at the Service's Southwestern Virginia Field Office located at 330 Cummings Street, Suite A, Abingdon, Virginia 24210.

Author: The primary author of this notice is John Schmerfeld, U.S. Fish and Wildlife Service, Virginia Field Office, 6669 Short Lane, Gloucester, Virginia 23061.

Authority: The authority for this action is the CERCLA of 1980 as amended, commonly known as Superfund (42 U.S.C. 9601 *et seq.*), and the Natural Resource Damage Assessment Regulations found at 43 CFR, part 11.

Dated: June 27, 2003.

Richard O. Bennett,

Acting Regional Director, Region 5, Fish and Wildlife Service, U.S. Department of the Interior, Designated Authorized Official.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO-200-1020-AC-241A]

Notice of Meeting, Front Range Resource Advisory Council (Colorado)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act (FLPMA) and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Front Range Resource Advisory Council (RAC), will meet as indicated below.

DATES: The meeting will be held on August 12 and 13, 2003. On August 12 the meeting will be held at the VFW Hall, 933 Sells Avenue, Canon City, Colorado from 7 p.m. to 9 p.m. The meeting will reconvene on August 13 at the Holy Cross Abbey Community Center, 2951 E. Highway 50, Canon City, Colorado from 9:15 a.m. to 4 p.m.

SUPPLEMENTARY INFORMATION: The 15 member Council advises the Secretary of the Interior, through the Bureau of Land Management, on a variety of planning and management issues associated with public land management in the Front Range Center, Colorado. Planned agenda topics include:

On August 12, 2003 the public is encouraged to provide comments on the preliminary draft Sustaining Working Landscapes Initiative.

On August 13, 2003 the Council will discuss the preliminary draft Sustaining Working Landscapes Initiative with the purpose of providing advice to the BLM Colorado State Director. All meetings are open to the public. The public is encouraged to make oral comments to the Council between 7 p.m. and 9 p.m. August 12 or written statements may be submitted for the Councils consideration. Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited. Summary minutes for the Council Meeting will be maintained in the Front Range Center Office and will be available for public inspection and reproduction during regular business hours within thirty (30) days following the meeting.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management (BLM), Attn: Ken Smith, 3170 East Main Street, Canon City, Colorado 81212. Phone (719) 269-8500.

Dated: July 8, 2003.

John L. Carochi,

Acting Front Range Center Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Operational Changes in Support of Lake Cascade Fishery Restoration, Boise Project, Payette Division, Idaho

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare an environmental impact statement and conduct public scoping meetings.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau of Reclamation (Reclamation) intends to prepare an environmental impact statement (EIS), and conduct associated public scoping meetings for proposed operational changes at Lake Cascade, on the North Fork Payette River near Cascade, Idaho. The purpose of the proposed operational changes is to allow the Idaho Department of Fish and Game (IDFG) to efficiently and effectively remove most of the northern pikeminnow and largescale suckers from the lake. IDFG has determined that the presence of large numbers of northern pikeminnow and largescale suckers in the lake are a major cause in the decline of the important yellow perch and trout fishery and will prevent recovery of the fishery unless their numbers are significantly reduced. The current proposal is for Reclamation to lower the water elevation of Lake Cascade to the lowest level possible to allow IDFG to remove the undesirable fish and restock the lake with perch and trout.

Reclamation has scheduled public meetings to describe the proposed project and obtain public input on potential impacts of the proposed operational changes at Lake Cascade. These meetings will assist in determining issues and concerns associated with the project that will be analyzed in the EIS.

DATES: Public scoping meetings will be held on the following dates:

- August 11, 2003, in Cascade, Idaho.
- August 12, 2003, in Boise Idaho.
- August 13, 2003, in Emmett, Idaho.

Each meeting will begin with a formal presentation about the proposed project from 7 p.m. to 7:30 p.m. followed by an informal open house from 7:30 p.m. to 8:30 p.m. Comments on the proposed project will be accepted through September 12, 2003.

The meeting facilities are physically accessible to people with disabilities. Please direct requests for sign language interpretation for the hearing impaired, or other auxiliary aids, to Steve Dunn by August 1, 2003, by telephone, fax, or TTY relay number listed under the **FOR FURTHER INFORMATION CONTACT** section of this notice.

ADDRESSES: Written comments or requests for inclusion on the EIS mailing list may be submitted to Bureau of Reclamation, Snake River Area Office, Attention: Steve Dunn, Natural Resources Specialist, 214 Broadway Avenue, Boise ID 83702-7298.

The meetings will be held at the following locations:

- August 11, 2003, at the American Legion Hall, 105 E Mill Street, Cascade, Idaho.

- August 12, 2003, at the Idaho Department of Fish and Game, 600 S Walnut, Boise Idaho.

- August 13, 2003, at the U.S. Department of Agriculture Service Center, 1805 Highway 16, Emmett, Idaho.

FOR FURTHER INFORMATION CONTACT:

Anyone interested in more information concerning the EIS, or who has information that may be useful in identifying significant environmental issues, may contact Mr. Steve Dunn at telephone 208-334-9844, or e-mail sdunn@pn.usbr.gov. TTY users may call 208-334-9844 by dialing 711 to obtain a toll free TTY relay.

SUPPLEMENTARY INFORMATION: Cascade Dam and Reservoir, located on the North Fork Payette River in west central Idaho, were constructed by Reclamation for use as a Federal irrigation facility. Cascade Reservoir, now designated Lake Cascade, has a storage capacity of 693,123 acre feet and encompasses 26,500 surface acres. Lake Cascade, along with Reclamation's Deadwood Reservoir, are part of Reclamation's Payette Division of the Boise Project. These reservoirs supply irrigation water to Idaho Water District 65, which encompasses the lower Payette River Basin. Hydropower is generated at Cascade Dam by Idaho Power Company.

At its peak from the late 1970's through the early 1990's, Lake Cascade was the most-fished water body in Idaho. The year-round yellow perch fishery and stocked rainbow trout and coho salmon not only provided thousands of recreation days for anglers but also significant income for the local economy. The perch fishery vanished and the trout fishery declined significantly in the mid-1990's, and neither has recovered.

IDFG began investigating the decline of the yellow perch fishery in Lake Cascade in 1998 and determined that large numbers of northern pikeminnow and largescale suckers in the lake are a major cause in the decline of the recreational fishery and will prevent recovery of the fishery unless their numbers are significantly reduced. Northern pikeminnow are predators on both yellow perch and trout, and largescale suckers are contributing to the decline of the fishery by competing for food resources.

IDFG has analyzed different methods to remove and/or reduce the numbers of northern pikeminnow and has concluded that the most economical method with the highest probability for
