

(b)(6) of the Freedom of Information Act (5 U.S.C. §§ 522(b)(4) and (b)(6)).

Abstract: The FR Y-6 is an annual report filed by all BHCs containing financial data, an organization chart, and information about shareholders. The Federal Reserve uses the data to monitor holding company operations and determine holding company compliance with the provisions of the BHC Act and Regulation Y (12 CFR 225).

Current actions: The Federal Reserve proposes to revise the FR Y-6 by requiring that only top-tier BHCs file the FR Y-6 report, eliminating Report Item 1(a) that requires a BHC to submit a copy of its Securities and Exchange Commission form 10-K, adding three minor items to the cover page, and clarifying several areas in the instructions. The proposed FR Y-6 revisions would be effective with fiscal years beginning after December 31, 2003.

Abstract: The FR Y-10 is an event-generated report filed by top-tier domestic BHCs, including FHCs, and state member banks unaffiliated with a BHC or FHC, to capture changes in their regulated investments and activities.

The Federal Reserve uses the data to monitor structure information on subsidiaries and regulated investments of these entities engaged in both banking and nonbanking activities.

The FR Y-10F is an event-generated report filed by FBOs, including FHCs, to capture changes in their regulated investments and activities. The Federal Reserve uses the data to ensure compliance with U.S. banking laws and regulations and to determine the risk profile of the FBO structure.

Current actions: The Federal Reserve proposes to revise the FR Y-10 and FR Y-10F forms and instructions in an effort to reduce respondent burden. The proposed revisions to the reporting forms consist primarily of reorganizing line items into separate schedules for banking and nonbanking investments. In addition, the Federal Reserve proposes to replace the Federal Reserve System activity codes with the North American Industrial Classification System codes and to reorganize and clarify the instructions. The Federal Reserve is considering the usefulness of a conversion table for converting the Federal Reserve Activity Codes to NAICS codes. The proposed revisions to the FR Y-10 and FR Y-10F would be implemented as of May 31, 2004.

Proposed Project: Jail STD Prevalence Monitoring System, OMB No. 0920-0499—Revision—National Center for HIV, STD's and Tuberculosis (NCHSTP), Centers for Disease Control and Prevention (CDC).

CDC is requesting from Office of Management and Budget (OMB) a 3-year approval for the standardized record layout for the Jail STD Prevalence Monitoring System. The Jail STD Prevalence Monitoring System consists of test data compiled for persons entering corrections facilities. The standard data elements were created in response to the need to systematically assess morbidity in persons entering corrections facilities, who are at high risk for STDs or sexually transmitted diseases and who often do not seek

medical care in mainstream medical settings. Use of these standard data elements will improve surveillance of STDs by allowing for systematic assessment of a high risk population, taking advantage of already computerized data.

States that compile data from corrections facilities are encouraged to participate in the system. In most places, STD test results for persons in corrections facilities are computerized by the laboratory or by the health department. The burden of compiling data in the standardized format involves running a computer program to convert the data to the specified format. This involves an initial investment of time by a programmer but afterwards involves only running the program once a quarter (average of 3 hours per quarter). Therefore, the respondent burden is approximately 12 hours per year.

If a respondent does not have computerized test results for persons in corrections facilities, and must enter the data, the burden of data-entry is approximately 1.5 minute per record. On an average a respondent will enter approximately 1250 records per quarter, which will result in a total burden of 1875 minutes or 31 hours per quarter.

During the next 3 years, CDC expects approximately 20 project areas per year to participate. Approximately 15 will have already computerized data for a burden of 180 hours (15x12hrs) per year and five respondents will have to enter data into a computerized database which will result in a burden of 620 additional hours (5x124 hrs) per year. The total estimated annualized burden is 880 hours per year.

Respondents	No. of respondents (STD project areas)	No. of responses/respondent (datasets/yr approx 5000 total records)	Average burden/response (in hours)	Total burden (in hours)
State/local health departments with computerized data	15	4	3	180
State/local health departments without computerized data	5	4	31	620
Total				880
