The Girls Study Group will provide state and local policymakers and practitioners with theoretically sound, culturally and developmentally appropriate, and empirically grounded strategies (encompassing program elements, principles, and policies) to prevent and reduce female delinquency and its consequences. One 2-year cooperative agreement will be awarded.

SUPPLEMENTARY INFORMATION: The ultimate goal of the Girls Study Group project is to develop the research foundation that communities need to make sound decisions about how best to prevent and reduce delinquency and violence by girls. The Girls Study Group will consist of 12 to 15 individuals who have the collective expertise (both practical and theoretical) in female development and juvenile justice system involvement to undertake a comprehensive study of this kind.

The successful applicant must possess the necessary leadership, organizational, and analytical capabilities essential for the Study Group's success. The project tasks require the ability to organize and convene a group of researchers and practitioners with recognized expertise in diverse areas of female juvenile delinquency, child development and adolescent health; childhood victimization (including child maltreatment, domestic violence, and other forms of victimization); mental health; substance abuse; community-based treatment; youth work and outreach; the juvenile justice, child welfare, and related systems; and education. Expertise in statistics, research methodology, prevention research, and program evaluation is also required. The successful applicant must also demonstrate the ability to lead and interact with group members in order to coordinate a comprehensive literature review, synthesize information from diverse sources, recommend future research topics, and produce interim and final reports and related publications that effectively communicate the results to a broad audience of Federal, State, and local policymakers, practitioners, and researchers.

Because this is a cooperative agreement, OJJDP will review and approve all project consultants, plans, and products developed.

Advanced Micro Devices (AMD), Fab 25, Austin, TX; Notice of Revised Determination on Reconsideration

By application of April 29, 2003, a petitioner requested administrative reconsideration regarding the Department's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance, applicable to the workers of the subject firm.

The initial investigation under this case number was for Advanced Micro Devices (AMD), Lone Star Fab Division, Austin, Texas, and resulted in a negative determination issued on April 7, 2003, based on the finding that imports of wafers and dies did not contribute importantly to worker separations at the subject plant. The denial notice was published in the **Federal Register** on April 24, 2003 (68 FR 20177).

To support the request for reconsideration, the petitioner stated that the Department had investigated the wrong worker group. Upon further review, it was revealed that the petitioner had not worked in the Lone Star Fab (also known as Fab 14 and Fab 15) but rather Fab 25, which produced a different product (a microprocessor chip).

Having identified the appropriate worker group, the Department contacted the company regarding imports of products like or directly competitive with those produced at Fab 25. As a result, it was revealed that the subject firm shifted production from Fab 25 to a foreign source within the relevant period, and subsequently imported directly competitive products to the U.S., contributing to layoffs at the subject plant.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with those produced at Advanced Micro Devices (AMD), Fab 25, Austin, Texas, contributed importantly to the declines in sales or production and to the total or partial separation of workers at the subject firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Advanced Micro Devices (AMD), Lone Star Fab Division, Austin, Texas, who became totally or partially

separated from employment on or after November 23, 2001, through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 9th day of July, 2003.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.
