## UTAH RECLAMATION MITIGATION AND CONSERVATION COMMISSION

### Notice of Availability of the Final Environmental Assessment and Finding of No Significant Impact for the Rehabilitation or Replacement of Diversion Dams on the Duchesne and Strawberry Rivers in Utah

**AGENCY:** Utah Reclamation Mitigation and Conservation Commission (Mitigation Commission).

**ACTION:** Notice of availability of the Final Environmental Assessment and Finding of No Significant Impact for the rehabilitation or replacement of diversion dams on the Duchesne and Strawberry Rivers in Utah.

**SUMMARY:** The Central Utah Project Completion Act (Pub. L. 102-575) authorized Federal funds to rehabilitate diversion dams on the Duchesne and Strawberry Rivers in Utah. The project is needed to reduce adverse effects on fish and wildlife resources.

The Final Environmental Assessment (EA) was prepared as a Programmatic document. It discusses potential environmental impacts associated with reconstructing and operating an unspecified diversion dam on the Duchesne or Strawberry River. The new diversion dam could serve single or multiple diversion rights. Potential environmental impacts addressed in the document are those impacts that would be expected regardless of which diversion dam is rehabilitated. Potential impacts to wetlands, threatened and endangered species and cultural resources are generally site specific and/or require special permits. Potential impacts to these environmental disciplines would be addressed in a Supplemental Environmental Assessment (SEA), if needed.

After considering the public comments received during scoping and agency consultation, and the analyses in the EA of environmental effects, it is my decision to select Alternative 3 for implementation, excepting the combination of the Farm Creek, Jasper-Pike and New Tabby diversions. With Alternative 3, several of the existing diversions on the Duchesne River and several of the existing diversions on the Strawberry River would be combined and new diversion dams that would serve multiple diversion rights would be constructed. This would involve transferring points of diversion from the downstream diversion(s) to the upstream diversion that would be constructed. Diversions would be combined only when the involved water rights would not be adversely affected.
