

Infrastructure upgrades, such as construction waste transfer pipelines, electric utility line realignment, and addition of access roads, would also be required. Any MOX fuel made at the proposed MOX facility would be transported to mission reactors, where it would be irradiated.

NRC published a Notice of Intent to prepare an EIS for the proposed MOX facility, and to conduct a scoping process, in the **Federal Register** on March 7, 2001 [66 FR 13794]. NRC staff subsequently held scoping meetings, and issued a Scoping Summary Report in August 2001. In early 2002, DOE announced its decision to alter its planned approach for surplus weapons plutonium disposition [67 FR 19432], causing the NRC to delay its issuance of the DEIS for the proposed MOX facility. On August 22, 2002, the NRC announced three mid-September public meetings to discuss changes in DCS' Environmental Report that resulted from changes in DOE's plans [67 FR 54501]. The meetings were held on September 17 in Savannah, Georgia, September 18 in Augusta, Georgia, and September 19 in Charlotte, North Carolina.

The DEIS describes the proposed action, and alternatives to the proposed action, including the no-action alternative. The DEIS' discussion of the no-action alternative evaluates the environmental impacts of the continued storage of surplus plutonium in various DOE locations nationwide, in the event NRC decides not to approve the proposed MOX facility. Alternatives considered but not analyzed in detail include alternate locations for the proposed MOX facility in the F-Area, alternative technology and design options, immobilization of surplus plutonium instead of producing MOX fuel, deliberately making off-specification MOX fuel, and the Parallel Project, the latter of which involves irradiating the MOX fuel in Candian CANDU reactors. Additionally, the DEIS compares the impacts of using HEPA filters to the impacts of using sand filters for removal of particulate air emissions.

The DEIS assesses the impacts of the proposed action and its alternatives for the issues of human health, air quality, hydrology, waste management, geology, noise, ecology, land use, cultural and paleontological resources, infrastructure, socioeconomics, accident impacts, decommissioning and environmental justice. Additionally, the DEIS analyzes and compares the costs and benefits of the proposed action.

Based on the evaluation in the DEIS, the NRC's preliminary recommendation is that the proposed action be approved,

with implementation of proposed mitigation measures which would eliminate or substantially lessen any potential adverse environmental impacts.

This DEIS is a preliminary analysis of the environmental impacts of the proposed action. The NRC will review the public's comments, conduct any necessary analyses, and make appropriate revisions in developing the Final EIS for the proposed MOX facility.

Participation in the public comment process for the DEIS does not entitle participants to become parties to the ongoing NRC adjudicatory proceeding pertaining to the construction of the proposed MOX facility. Participation in adjudicatory proceedings is governed by the 10 CFR part 2 hearing procedures.

Dated at Rockville, Maryland, this 20th day of February 2003.

The rule also prohibits the rehypothecation of customers' margin securities for a sum in excess of the customer's aggregate indebtedness. See Securities Exchange Act Release No. 2690 (November 15, 1940); Securities Exchange Act Release No. 9428 (December 29, 1971). Pursuant to Rule

15c2-1, respondents must collect information necessary to prevent the rehypothecation of customer account in contravention of the rule, issue and retain copies of notices of hypothecation of customer accounts in accordance with the rule, and collect written consents from customers in accordance with the rule. <sup>3</sup> NASD represents that there was an error in the proposed rule language in its original 19b-4 filing. The phrase "unless an opposition proxy statement is furnished to security holders," should have been underlined to indicate proposed new rule language. Telephone conversation between Shirley H.
