

Washington, five segments of its existing 26-inch Ignacio to Sumas mainline have had a class location change under Department of Transportation's regulations from a Class 2 to a Class 3 location. Accordingly, Northwest proposes to replace these five segments of pipeline totaling approximately 3.3 miles, with thicker walled pipe (from 26-inch 0.281" wall thickness Grade X-52 to 26-inch 0.312" wall thickness Grade X-70) and to install a new 26-inch mainline valve at milepost 1411.32 to meet the spacing requirements for Class 3 areas. Northwest states that approximately 865 feet of the replaced segments of pipeline will be abandoned in place, purged, packed with nitrogen and capped and the remainder will be removed. Northwest states that the new replacement pipeline will be installed within its existing 75-foot permanent right-of-way, but a wider construction right-of-way will be required in certain areas, along with additional temporary construction workspace.

According to Northwest, the proposed like-size replacement of segments of pipeline will not change the existing daily design capacity, daily maximum capacity or operating pressures on its system. Northwest states that the total estimated cost for this proposed pipeline replacement project is approximately \$9.1 million, including the approximately \$380,000 cost of removing replaced segments of pipeline.

Any questions concerning this request may be directed to Gary K. Kotter, Manager, Certificates and Tariffs—3F3, Northwest Pipeline Corporation, PO Box 58900, Salt Lake City, Utah 84158-0900, at (801) 584-7117 or fax (801) 584-7764 or garold.k.kotter@williams.com.

If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest.
