

individual-level treatment and control groups for future third-party study); (2) project implementation characteristics (also necessary for future use to identify well-matched comparison groups) and (3) project outputs (necessary to measure baseline for pre- and post-NSF-funding-level impacts.)

Use of the Information: This information is required for effective administration, communication, program and project monitoring and evaluation, and for measuring attainment of NSF's program, project and strategic goals, as required by the President's Management agenda as represented by the Office of Management and Budget's (OMB) Program Assessment Rating Tool (PART); the Deficit Reduction Act of 2005 (Pub. L. 109-171) which established the Academic Competitiveness Council (ACC), and the NSF's Strategic Plan. The Foundation's FY 2006-2011 Strategic Plan describes four strategic outcome goals of Discovery, Learning, Research Infrastructure, and Stewardship. NSF's complete strategic plan may be found at: http://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf0648.

The work of the multi-agency ACC employed a methodological framework to determine STEM education program effectiveness. The ACC was chaired by the Department of Education, and other agencies that participated included the NSF and the National Aeronautics and Space Administration (NASA). The ACC suggested cross-agency STEM education goals and metrics and developed a framework or "Hierarchy of Study Designs" under three scientific categories: (1) Experimental (often called randomized controlled trials—RCT) (2) quasi-experimental (such as well-matched comparison group studies) and (3) other (such as pre- and post-test and multiple methodologies). Further details on the participating agencies and the ACC's recommendations are available at: <http://www.ed.gov/about/inits/ed/competitiveness/acc-mathscience/index.html>.

Since the EHR Generic Clearance research is primarily used for accountability purposes, including responding to queries from Committees of Visitors and other scientific experts, a census rather than sampling design typically is necessary. At the individual project level, funding can be adjusted based on individual project's responses to some of the surveys. Some data collected under the EHR Clearance serve as baseline data for separate research and evaluation studies. The EHR Generic Clearance may be used to clear

data collections for other ACC agencies, such as NASA. In February 2007 NASA and NSF signed a *Memorandum of Understanding (MOU)* to coordinate efforts promoting STEM education, the participation of individuals underrepresented in STEM, and evaluation of STEM education projects and programs in formal and informal settings. Additional information on the NSF-NASA MOU can be found at: http://education.nasa.gov/divisions/higher/overview/F_One_Giant_Step_STEM_Education.html.

In order to conduct program or portfolio level evaluations, however, both experimental and quasi-experimental evaluation research studies on STEM education interventions require researchers to identify individual-level and organizational or project-level control and treatment groups or comparison groups. NSF-funded contract or grantee researchers and evaluators in part may identify control, comparison, or treatment groups for NSF's E&T portfolio using some of the descriptive data gathered through OMB 3145-0136 to conduct well-designed, rigorous research and portfolio evaluation studies.

In accordance with the 2001 and 2005 OMB terms of clearance, NSF requests separate stand-alone clearance (and separately announces for comment in the **Federal Register**) any program or portfolio research or evaluation. Two examples of third-party evaluations that used EHR OMB 3145-0136 data to inform study design are: OMB 3145-0190 (Expired: 5/2005) Evaluation of NSF's Louis Stokes Alliances for Minority Participation (LSAMP) program conducted by the Urban Institute and OMB No. 3145-0182 (Expired 7/2005) Evaluation of the Initial Impacts of the Integrative Graduate Education Research and Traineeship (IGERT) program conducted by Abt Associates. For more information on these and other NSF-funded evaluations, please see the NSF's FY 2006 Full Performance and Accountability Report: Appendix 4B: Table of External Evaluations at: <http://www.nsf.gov/pubs/2007/nsf0701/pdf/19.pdf>.

Respondents: Individuals or households, not-for-profit institutions, business or other for profit, and Federal, State, local or tribal government.

Number of Respondents: 27,000.

Burden on the Public: The total estimate for this collection is 60,000 annual burden hours. This figure is based on the previous 3 years of collecting information under this

clearance and anticipated collections. The average annual reporting burden is between .5 and 50 hours per 'respondent' depending on whether a respondent is a direct participant who is self-reporting, or representing a project and reporting on behalf of many project participants.

Dated: December 4, 2007.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No.: 70-27]

BWX Technologies, Inc.; Environmental Assessment and Finding of No Significant Impact Related to Proposed Issuance of an Exemption From 10 CFR 70.24 Requirements

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment (EA) and finding of no significant impact (FONSI).

FOR FURTHER INFORMATION CONTACT:

Amy M. Snyder, Fuel Manufacturing Branch, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Mail Stop EBB-2C40M, Washington, DC 20555-0001, telephone (301) 492-3225 and e-mail ams3@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

Under U.S. Nuclear Regulatory Commission (NRC) license SNM-42 and the provisions of 10 CFR Part 70, Domestic Licensing of Special Nuclear Material, BWX Technologies, Inc. (BWXT or the licensee) is authorized to receive and possess special nuclear material for the research, fabrication and assembly of nuclear fuel and related components at its facility, located in Lynchburg, Virginia. Under this license, BWXT is also allowed to receive, acquire, and transfer irradiated fuel (spent nuclear fuel) at its facility. The NRC staff is considering the issuance of an exemption to requirements of Title 10 of the Code of Federal Regulations (10 CFR) Section 70.24, under a certain condition, for the spent nuclear fuel storage areas at the BWXT site. If the NRC decides to grant the exemption, then the license will be amended to incorporate a license condition to reflect

the exemption. These actions would then allow BWXT to implement its proposed method to meet the January 16, 2007, NRC Order (EA-07-011) requiring BWXT to implement additional security measures at the BWXT site. The licensee found that if these measures are taken, it would not be in full compliance with the criticality monitoring requirements of 10 CFR 70.24. Granting this exemption would also allow BWXT to continue to store, in a safe configuration, spent nuclear fuel.

The NRC has prepared an EA in support of granting an exemption and amending the license. Based on this EA, the NRC has concluded that a FONSI is appropriate and, therefore, an environmental impact statement (EIS) is not warranted. The NRC is also conducting a safety review of the BWXT request for exemption. The results of the safety review will be documented in a separate Safety Evaluation Report.

II. Environmental Assessment

Background

By letter, dated May 2, 2007, BWXT submitted its exemption request. On May 14, 2007, BWXT submitted, via email, a clarification that stated its current Environmental Report (ER), dated March 10, 2004, addresses the areas where spent nuclear fuel, previously used for research, is stored at the site.

The documents that were evaluated in preparing this EA included the NRC's EA for Renewal of License SNM-42, dated August 2005, the current BWXT ER for Renewal of License SNM-42, dated March 10, 2004, and the e-mail from BWXT (Leah Morrell, May 14, 2007) stating, with respect to this exemption request, that the BWXT's ER, dated March 10, 2004, is the current ER.

Review Scope

The purpose of this EA is to assess the environmental impacts of the proposed exemption and associated license amendment. It does not approve the request. This EA is limited to the proposed exemption from the requirements of 10 CFR 70.24 in spent nuclear fuel storage areas, and any cumulative impacts on existing plant operations. The existing conditions and operations at the BWXT facility were evaluated, by the NRC, for environmental impacts in an EA for the renewal of the BWXT license. This assessment presents the information and analysis of the proposed actions for determining whether issuance of a FONSI is appropriate.

Need for the Proposed Action

As a result of the events of September 11, 2001, the NRC has required heightened security measures for facilities that are authorized to possess special nuclear material. BWXT is one such facility. Following an evaluation, by BWXT, of ways to meet these required security measures, BWXT concluded that the best method to meet those measures would affect the current criticality monitoring system. Specifically, the implementation of BWXT's proposed method to implement the NRC Security Order (EA-07-011) would make the detection of a criticality challenging for the criticality monitoring systems located in each spent nuclear fuel storage area when the additional security measures imposed by EA-07-011 are in place. The additional security measures are not currently in place.

The Proposed Actions

The proposed actions are: (1) The NRC granting an exemption to the requirements of 10 CFR 70.24 in the spent fuel storage areas during the period of time the licensee does not need to access the spent nuclear fuel; and (2) the NRC issuing an amendment to the license reflecting such an exemption. These actions would allow BWXT to continue to safely store spent nuclear fuel in storage systems. This exemption would not apply during the short and very infrequent periods during which access to the stored material is required, or if BWXT no longer has spent nuclear fuel at its licensed site. The proposed actions are in accordance with the licensee's application dated May 2, 2007.

Alternative to the Proposed Actions

The actions available to the NRC are:

1. Approve the exemption and associated license amendment as described; or
2. No action (i.e., deny the request and do not amend the license—the no-action alternative.)

Affected Environment

The affected environment for the proposed action and the alternative is the BWXT site. The affected environment is identical to the affected environment assessed in the EA, dated August 2005. A full description of the site and its characteristics is given in the NRC's 2005 EA.

Environmental Impacts of the Proposed Action and the No Action Alternative

The NRC staff has completed its evaluation of the environmental impacts of the proposed action and concludes

granting the licensee an exemption to the criticality monitoring requirements of 10 CFR 70.24 for the spent nuclear fuel storage system during periods when access to the spent nuclear fuel is not required; and would not increase the probability or consequences of accidents previously analyzed and would not affect facility radiation levels or facility radiological effluents. No changes are being made in the types of effluents that may be released off-site. There is no significant increase in the amount of any effluent released off-site. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites because no previously undisturbed area will be affected by the proposed actions. The proposed action does not affect non-radiological plant effluents and has no other effect on the environment. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC staff concludes that there are no significant environmental impacts associated with the proposed action and, thus, concludes that the proposed action will not have any significant impact to the human environment. The proposed action does not alter the previous National Environmental Protection Act findings made in approving the license renewal.

Environmental Impacts of the Alternative to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (i.e., the no-action alternative). Denial of the exemption request would result in: (1) No associated license amendment; and (2) no change to current environmental impacts, as the denial would result in the criticality monitoring requirements of 10 CFR 70.24 continuing to be fully applicable. Thus, the environmental impacts of the proposed action and the alternative action are identical because the present or absence of a criticality monitor and alarm for the spent nuclear fuel that is safely stored has no impact on the environment.

Agencies and Persons Consulted

In accordance with NUREG 1748, "Environmental Review Guidance for Licensing Actions Associated with NMSS Programs," the NRC staff consulted with other agencies regarding

the proposed actions. These consultations were intended to provide other agencies an opportunity to comment on the proposed actions, and to ensure that the requirements of Section 106 of the National Historic Preservation Act, and Section 7 of the Endangered Species Act were met with respect to the proposed actions.

Commonwealth of Virginia

The staff, on October 10, 2007, consulted with the Virginia Department of Environmental Quality (VDEQ) and the Virginia Department of Health (VDH). The VDEQ reviewed the draft and agreed with NRC's conclusion that no significant environmental impacts would result from this proposed action, if implemented. The VDH had technical questions regarding the criticality monitoring systems.

Fish and Wildlife

The staff has determined that consultation for Section 7 of the Endangered Species Act is not required because the proposed action does not involve construction or any other change in physical environment, therefore, will not affect listed species or critical habitat.

Virginia Department of Historic Resources

The staff has determined that the proposed action does not have the potential to effect on historic properties because it does not involve construction or any other change in physical environment. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

Conclusion

On the basis of the EA, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment and that preparation of an EIS is not warranted.

III. Finding of No Significant Impact

On the basis of this assessment, the Commission has concluded that environmental impacts that are associated with the proposed action would not be significant and the Commission is making a finding of no significant impact.

Preparers

J. Wiebe, Project Manager, All Sections
A. Snyder, Project Manager, Sections 1.0, 4.0 and 5.0.

BILLING CODE 7590-01-P

OFFICE OF MANAGEMENT AND BUDGET

Financial Reporting for Grants and Cooperative Agreements: Federal Financial Report (FFR)

AGENCY: Office of Management and Budget, Office of Federal Financial Management.

ACTION: Comment request; final notice.

SUMMARY: The Office of Management and Budget is consolidating and replacing four existing financial reporting forms (SF-269, SF-269A, SF-272, and SF-272A) with a single *Federal Financial Report (FFR)*. The purpose of the *FFR* is to give recipients of grants and cooperative agreements a standard format for reporting the financial status of their grants and cooperative agreements (hereby referred to

collectively as awards). Federal awarding agencies developed the *FFR* as part of their implementation of the Federal Financial Assistance Management Improvement Act of 1999 (Pub. L. 106-107).

DATES: Comments must be received by January 7, 2008.

ADDRESSES: Comments should be addressed to Marguerite Pridgen, Office of Federal Financial Management, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503; telephone 202-395-7844; fax 202-395-3952; e-mail mpridgen@omb.eop.gov. Due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, we encourage respondents to submit comments electronically to ensure timely receipt. We cannot guarantee that comments mailed will be received before the comment closing date. Please include "FFR comments" in the subject line of the e-mail message; please also include the full body of your comments in the text of the message and as an attachment. Include your name, title, organization, postal address, telephone number, and e-mail address in your message.

FOR FURTHER INFORMATION CONTACT: Marguerite Pridgen at the addresses noted above.

SUPPLEMENTARY INFORMATION:

I. Background

On April 8, 2003, OMB announced in the *Federal Register* its intent to establish a new *Federal Financial Report (FFR)* (68 FR 17097). This new report would consolidate into a single report the current Financial Status Report (SF-269 and SF-269A) and the Federal Cash Transactions Report (SF-272 and SF-272A). This consolidation, consistent with government-wide grant streamlining efforts being carried out under the Federal Financial Assistance Management Improvement Act of 1999 (Pub. L. 106-107), is intended to streamline and simplify award-reporting requirements. This form was an undertaking of the interagency Post Award Workgroup that supports the Federal Grants Streamlining Initiative. Additional information on the Federal Grants Streamlining Initiative, which focuses on implementing Public Law 106-107, was announced in the *Federal Register* on September 13, 2006 (71 FR 54098). An overview of the *FFR* and five other report forms being developed under the Initiative was provided during a webcast of the Grants Policy Committee of the U.S. Chief Financial
