What Information Is EPA Particularly Interested In?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Docket ID No. EPA-HQ-2004-0006.

Affected Entities: Entities potentially affected by this action are manufacturers and non-manufacturers.

Title: Community Right-to-Know Reporting Requirements Under Sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA)

ICR Number: EPA ICR No. 1352.11, OMB Control No. 2050-0072.

ICR Status: This ICR is currently scheduled to expire on January 31, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The authority for these requirements is sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA), 1986 (42 U.S.C. 11011, 11012). EPCRA Section 311 requires owners and operators of facilities subject to OSHA Hazard Communication Standard to submit a list of chemicals or MSDSs (for those chemicals that exceed thresholds, specified in 40 CFR part 370) to the State Emergency Response Commission (SERC), Local Emergency Planning Committee (LEPC) and the local fire department (LFD) with jurisdiction over their facility. This is a one-time requirement unless a new facility becomes subject to the regulations or updating the information by facilities that are already covered by the regulations. EPCRA section 312 requires owners and operators of facilities subject to OSHA HCS to submit an inventory form (for those chemicals that exceed the thresholds, specified in 40 CFR part 370) to the SERC, LEPC, and LFD with jurisdiction over their facility. This form is to be submitted on March 1 of each year, on the inventory of chemicals in the previous calendar year.

Burden Statement: The average burden for MSDS reporting under 40 CFR 370.21 is estimated at 1.6 hours for new and newly regulated facilities and approximately 0.6 hours for those existing facilities that obtain new or revised MSDSs or receive requests for MSDSs from local governments. For new and newly regulated facilities, this burden includes the time required to read and understand the regulations, to determine which chemicals meet or exceed reporting thresholds, and to submit MSDSs or lists of chemicals to

SERC, LEPCs, and local fire departments. For existing facilities, this burden includes the time required to submit revised MSDSs and new MSDSs to local officials. The average reporting burden for facilities to submit Tier I or Tier II inventory report under 40 CFR 370.25 is estimated to be approximately 3.1 hours per facility. There are no recordkeeping requirements for facilities under EPCRA sections 311 and 312.

The average burden for state and local governments to respond to requests for MSDSs or Tier II information under 40 CFR 370.30 is estimated to be 0.17 hours per request. The average burden for state and local governments for managing and maintaining the reports is estimated to be 32.25 hours. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated Total Number of Potential Respondents: 564,132.

Frequency of Response: Annual.
Estimated Total Average Number of Responses for Each Respondent: 1.

Estimated Total Annual Burden Hours: 2,031,859.

Estimated Total Annual Costs: \$96 million.

This includes capital investment or maintenance and operational costs.

There is an increase of 2,160 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase is due to the increase in the number of facilities that may be subject to the hazardous chemical inventory requirements.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR

1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: July 26, 2007.

Director, Office of Emergency Management.

The Commission will publish a separate document in the **Federal Register** announcing the effective date of those rules upon OMB approval.
