

portion of an NDA holder's CFC MDIs, the contract filler and the NDA holder must determine the total amount of CFCs necessary to produce the NDA holder's entire product line of CFC MDIs. The NDA holder must provide an estimate of how the CFCs would be split between the contract filler and the NDA holder in the allocation year. This estimate will be used only as a basis for determining the nomination amount, and may be adjusted prior to allocation of essential use allowances. Since the U.S. Government does not forward incomplete or inadequate nominations to the Ozone Secretariat, it is important for applicants to provide all information requested in the Handbook, including comprehensive information pertaining to the research and development of alternative CFC MDI products per Decision VIII/10, para. 1 as specified in the Supplement to Nomination Request (pg. 46). In addition, consistent with Decision XIX/13 from the 19th Meeting of the Parties, for each MDI for which an essential use allowance is requested, applicants should provide the following information to the U.S. Government: the company's commitment to the reformulation of the concerned products; the timetable in which each reformulation process may be completed; evidence that the company is diligently seeking approval of any CFC-free alternative(s) in its domestic and export markets and transitioning those markets away from its CFC products. Please note that this information will not be forwarded to the Ozone Secretariat.

The accounting framework matrix in the Handbook (Table IV) entitled "Reporting Accounting Framework for Essential Uses Other Than Laboratory and Analytical Applications" requests data for the year 2007 on the amount of ODSs exempted for an essential use, the amount acquired by production, the amount acquired by import and the country(s) of manufacture, the amount on hand at the start of the year, the amount available for use in 2007, the amount used for the essential use, the quantity contained in exported products, the amount destroyed, and the amount on hand at the end of 2007. Because all data necessary for applicants to complete Table IV will not be available until after the control period ends on December 31, 2008, companies should not include this chart with their essential use applications in response to this notice. Instead, companies should report their data as required by 40 CFR 82.13(u)(2) in Section 5 of the report entitled "Essential Use Allowance Holders and

Laboratory Supplier Quarterly Report and Essential Use Allowance Holder Annual Report." This form may be found on EPA's Web site at http://www.epa.gov/ozone/record/downloads/EssentialUse_ClassI.doc. EPA will then compile companies' responses to complete the U.S. Accounting Framework for Essential Uses for submission to the Parties to the Montreal Protocol by the end of January 2008. EPA may also request additional information from companies to support the U.S. nomination using its information gathering authority under Section 114 of the Act.

EPA anticipates that the Parties' review of MDI essential use requests will focus extensively on the United States' progress in phasing out CFC MDIs, including education programs to inform patients and health care providers of the CFC phaseout and the transition to alternatives. Accordingly, applicants are strongly advised to present detailed information on these points, including the scope and cost of such efforts and the medical and patient organizations involved in the work. In addition, EPA expects that Parties will be interested in research and development activities being undertaken by MDI manufacturers to develop and transition to alternative, CFC-free MDI products. To this end, applicants are encouraged to provide detailed information in this regard. Applicants should submit their exemption requests to EPA as noted in the **ADDRESSES** section above.
