SUPPLEMENTARY INFORMATION:

Title: Commercial Motor Vehicle Driver Risk Factor Study.

OMB Control No: 2126-xxxx.

Type of Request: New Collection.

Respondents: Commercial motor vehicle drivers and motor carriers.

Estimated Number of Respondents: 700.

Estimated Time per Response: The estimated average burden per response is 20 minutes for telephone interviews; 30 minutes for paper/online questionnaires; 4 hours for in-person interviews, including psychological and perceptual testing, and medical examinations; and 30 minutes for motor carriers to locate and deliver respondents' driving records to researchers.

Frequency: This information will be a single, nonrecurring event.

Estimated Total Annual Burden: 1,124 hours [100 participating carriers × 2 hours to provide information to researchers + 100 non-response carriers × 30 minutes/60 minutes + 600 non-response CMV drivers × 5 minutes/60 minutes + 600 CMV driver telephone interviews × 20 minutes/60 minutes + 600 CMV driver paper/online questionnaires × 30 minutes/60 minutes + 72 in-person interviews, psychological and perceptual testing, and medical examinations × 4 hours + 20 carriers locating and delivering 72 drivers' driving records × 30 minutes per driver/60 minutes = 1,124 hours].

Background: The purpose of this study is to identify, verify, quantify, and prioritize commercial motor vehicle (CMV) driver risk factors. Primarily, these factors are personal, such as demographic characteristics, medical conditions, personality traits, and performance capabilities. Risk factors may also include work environmental conditions, such as carrier operations type, and compensation methods. The study will identify risk factors by linking the characteristics of individual drivers with their driving histories,

especially the presence or absence of crashes or inspection violations.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FMCSA's performance; (2) the accuracy of the estimated burden; (3) ways for the FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Issued on: March 13, 2007.

Rose A. McMurray,

Chief Safety Officer, Assistant Administrator.
