

Paragraph (j) also requires that air quality records include specified information, and that employers maintain the records until the underground construction project is complete; they must also make the records available to OSHA compliance officers on request.

Maintaining records of air quality tests allows employers to document atmospheric hazards, and to ascertain the effectiveness of controls (especially ventilation) and implement additional controls if necessary. Accordingly, these requirements prevent serious injury and death to employees who work on underground construction projects. In addition, these records provide an efficient means for employees to evaluate the accuracy and effectiveness of an employer's exposure reduction program, and for OSHA compliance officers to determine that employers performed the required tests and implemented appropriate controls.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format,

reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Two construction standards, "Medical Services and First Aid" (§ 1926.50), and "General Requirements for Storage" (§ 1926.250), contain posting provisions. Paragraph (f) of § 1926.50 requires employers to post emergency telephone numbers for physicians, hospitals, or ambulances at the worksite if the 911 emergency telephone service is not available; in the event an employee has a serious injury at the worksite, this posting requirement expedites emergency medical treatment of the employee. Paragraph (a)(2) of § 1926.250 specifies that employers must post the maximum safe load limits of floors located in storage areas inside buildings or other structures, unless the floors are on grade. This provision prohibits employers from overloading floors in areas used to store material and equipment in multi-story units that are under construction, thereby preventing the floors from collapsing and seriously injuring employees.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the two construction standards, "Medical Services and First Aid" paragraph (f) of § 1926.50, and "General Requirements for Storage" paragraph (a)(2) of § 1926.250. The Agency is requesting to increase its current burden hour total from 8,901 hours to 197,819, for a total increase of 188,918 hours associated with these two Standards. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of currently approved information collection requirements.

Title: Construction Standards on the Posting of Emergency Telephone Numbers and Floor Load Limits.

OMB Number: 1218-0093.

Affected Public: Business or other for-profit; not-for-profit institutions; Federal Government; State, local, or Tribal governments.

Number of Respondents: 801,837.

Frequency of Response: On occasion.

Total Responses: 1,591,674.

Average Time per Response: Varies from 2 minutes (.03 hour) to post emergency numbers to 15 minutes (.25 hour) to develop and post load limits for floors.

Estimated Total Burden Hours: 197,819.

Estimated Cost (Operation and Maintenance): \$0.
