

“If comments from the public are received as a result of the Notice of Availability, the FAA will address them during its recurring review of the consensus standards and participation in the consensus standards revision process.”

And—

“The FAA will respond to comments on the consensus standard in this revision process.”

ASTM International Committee F37 examined the public comments received on these new and revised standards and determined the comments did not warrant or justify any changes or revisions to the standards.

Consensus Standards in This Notice of Availability

The FAA has reviewed the standards presented in this NOA for compliance with the regulatory requirements of the rule. Any light-sport aircraft issued a special light-sport airworthiness certificate, which has been designed, manufactured, operated and maintained, in accordance with this and previously accepted ASTM consensus standards provides the public with the appropriate level of safety established under the regulations. Manufacturers who choose to produce these aircraft and certificate these aircraft under 14 CFR part 21, §§ 21.190 or 21.191 are subject to the applicable consensus standard requirements. The FAA maintains a listing of all accepted standards on the FAA Web site.

The Revised Consensus Standards and Effective Period of Use

The following previously accepted consensus standards have been revised, and this NOA is accepting the later revisions. Either the previous revisions or the later revisions may be used for the initial certification of special light-sport aircraft until July 1, 2007. This overlapping period of time will allow aircraft that have started the initial certification process using the previous revision levels to complete that process. After July 1, 2007, manufacturers must use the later revisions and must identify these later revisions in the Statement of Compliance for initial certification of special light-sport aircraft unless the FAA publishes a specific notification otherwise. The following Consensus Standards may not be used after July 1, 2007:

a. ASTM Designation F 2245–04, titled: Standard Specification for Design and Performance of a Light Sport Airplane.

b. ASTM Designation F 2279–03, titled: Standard Practice for Quality

Assurance in the Manufacture of Light Sport Airplanes.

c. ASTM Designation F 2295–03, titled: Standard Practice for Continued Operational Safety Monitoring of a Light Sport Airplane.

d. ASTM Designation F 2316–03, titled: Standard Specification for Airframe Emergency Parachutes for Light Sport Aircraft.

e. ASTM Designation F 2339–05, titled: Standard Practice for Design and Manufacture of Reciprocating Spark Ignition Engines for Light Sport Aircraft.

f. ASTM Designation F 2415–05, titled: Standard Practice for Continued Airworthiness System for Light Sport Gyroplane Aircraft.

The Consensus Standards

The FAA finds the following new and revised consensus standards acceptable for certification of the specified aircraft under the provisions of the Sport Pilot and Light-Sport Aircraft rule. The consensus standards listed below may be used unless the FAA publishes a specific notification otherwise.

a. ASTM Designation F 2245–06, titled: Standard Specification for Design and Performance of a Light Sport Airplane.

b. ASTM Designation F 2279–06, titled: Standard Practice for Quality Assurance in the Manufacture of Fixed Wing Light Sport Aircraft.

c. ASTM Designation F 2295–06, titled: Standard Practice for Continued Operational Safety Monitoring of a Light Sport Aircraft.

d. ASTM Designation F 2316–06, titled: Standard Specification for Airframe Emergency Parachutes for Light Sport Aircraft.

e. ASTM Designation F 2339–06, titled: Standard Practice for Design and Manufacture of Reciprocating Spark Ignition for Light Sport Aircraft.

f. ASTM Designation F 2415–06, titled: Standard Practice for Continued Airworthiness System for Light Sport Gyroplane Aircraft.

g. ASTM Designation F 2563–06, titled: Standard Practice for Kit Assembly Instructions of Aircraft Intended Primarily for Recreation.

h. ASTM Designation F 2564–06, titled: Standard Specification for Design and Performance of a Light Sport Glider.
