

Agency should provide permit-based support.

H. Identification of New Industrial Categories and Sectors

EPA solicits comment on the methodology for grouping industrial sectors currently not subject to effluent guidelines or pretreatment standards for review and prioritization, and the factors and measures EPA should consider for determining whether to identify such industries for a rulemaking. EPA solicits comment on other data sources and approaches EPA can use to identify industrial sectors currently not subject to effluent guidelines or pretreatment standards for review and prioritization.

I. Implementation Issues Related to Existing Effluent Guidelines and Pretreatment Standards

As a factor in its decision-making, EPA considers opportunities to eliminate inefficiencies or impediments to pollution prevention or technological innovation, or opportunities to promote innovative approaches such as water quality trading, including within-plant trading. Consequently, EPA solicits comment on implementation issues related to existing effluent guidelines and pretreatment standards.

J. EPA's Evaluation of Categories of Indirect Dischargers Without Categorical Pretreatment Standards To Identify Potential New Categories for Pretreatment Standards

EPA solicits comments on its evaluation of categories of indirect dischargers without categorical

pretreatment standards. Specifically, EPA solicits wastewater characterization data (e.g., wastewater volumes, concentrations of discharged pollutants), current examples of pollution prevention, treatment technologies, and local limits for all industries without pretreatment standards. EPA also solicits comment on whether there are industrial sectors discharging pollutants that cause interference issues that cannot be adequately controlled through the general pretreatment standards.
