ACTION: Final rule.

SUMMARY: Base (1% annual chance) Flood Elevations (BFEs) and modified BFEs are made final for the communities listed below. The BFEs and modified BFEs are the basis for the

floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing BFEs and modified BFEs for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated on the table below.

ADDRESSES: The final BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The

respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: William R. Blanton, Jr., Engineering Management Section, Mitigation Division, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-3151.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the modified BFEs for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Mitigation Division Director of FEMA has resolved any appeals resulting from this notification.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community. The BFEs and modified BFEs are made final in the communities listed below. Elevations at selected locations in each community are shown.

Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2007 Aleutian Islands Atka Mackerel Total Allowable Catch Amounts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment; request for comments.

SUMMARY: NMFS is adjusting the annual total allowable catch amount (TAC) for the Central and Western Aleutian District Atka mackerel fisheries. This action is necessary because NMFS has determined these TACs are incorrectly specified. This action will ensure the A and B season harvests of Central and Western Aleutian District Atka mackerel do not exceed the appropriate amount based on the best available scientific information for Atka mackerel in the Aleutian Islands subarea. This action is consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP).

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), January 12, 2007, through 2400 hrs, A.l.t., April 15, 2007, unless otherwise modified or superseded through publication of a notification in the **Federal Register**. Comments must be received at the following address no later than 4:30 p.m., A.l.t., January 29, 2007.

ADDRESSES: Send comments to Sue Salveson, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region, NMFS, Attn: Ellen Sebastian. Comments may be submitted by:

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the Bering Sea and Aleutian Islands (BSAI) according to the FMP prepared by the North Pacific Fishery Management Council (Council) under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2007 TAC of Atka mackerel in the Central Aleutian District of the BSAI is 38,000 metric tons (mt) as established by the 2006 and 2007 harvest specification for groundfish in the BSAI

(71 FR 19894, March 3, 2006). In accordance with § 679.20(a)(8)(ii), the 2007 A and B season allowances of Atka mackerel in the Central Aleutian District of the BSAI are each 17,575 mt, and the 2007 A and B season Harvest Limit Area (HLA) limits of Atka mackerel in the Central Aleutian District of the BSAI are each 10,545 mt.

The 2007 TAC of Atka mackerel in the Western Aleutian District of the BSAI is 17,500 mt as established by the 2006 and 2007 harvest specification for groundfish in the BSAI (71 FR 19894, March 3, 2006). In accordance with § 679.20(a)(8)(ii), the 2007 A and B season allowances of Atka mackerel in the Western Aleutian District of the BSAI are each 8,750 mt, and the 2007 A and B season Harvest Limit Area (HLA) limits of Atka mackerel in the Western Aleutian District of the BSAI are each 5,250 mt.

In December 2006, the Council recommended a 2007 Atka mackerel TAC of 29,600 mt for the Central Aleutian District and 9,600 mt for the Western Aleutian District. These amounts are less than the TACs as established by the 2006 and 2007 harvest specification for groundfish in the BSAI (71 FR 19894, March 3, 2006). The TACs recommended by the Council are based on the Stock Assessment and Fishery Evaluation report (SAFE), dated November 2006, which NMFS has determined is the best available scientific information for this fishery.

Steller sea lions occur in the same location as the Aleutian Islands Atka mackerel fishery and are listed as endangered under the Endangered Species Act (ESA). Atka mackerel is a principal prey species for Steller sea lions in the Aleutian Islands subarea. The seasonal apportionment of Atka mackerel harvest is necessary to ensure the groundfish fisheries are not likely to cause jeopardy of extinction or adverse modification of critical habitat for Steller sea lions. The regulations at § 679.20(a)(ii)(8)(A) require the Atka
