Background: This notice announces institution of an investigation relating to preparation of the second in a series of three reports, as further described below. In its letter of May 23, 2007, the

Committee noted that it had earlier, in a letter dated September 21, 2006, requested that the Commission prepare three reports relating to U.S.-China trade. In its May 23, 2007 letter, the Committee requested that the Commission augment the earlier request by adding two more components to its investigation to provide an in-depth assessment of the causes of the U.S.-China trade imbalance and whether and to what extent China uses various forms of government intervention to promote investment, employment, and exports. The Committee allotted additional time to complete these requests, with the first report to be delivered 7 months after receipt of the May 23, 2007 letter, and the second and third reports to be delivered 14 and 24 months, respectively, after receipt of the letter. To prepare the first report, the Commission instituted investigation No. 332–492, *China: Description of Selected Government Practices and Policies Affecting Decision-Making in the Economy*, on June 21, 2007; the Commission expects to submit its report to the Committee in that investigation by December 29, 2007. In its letter the Committee also requested that the Commission expand the scope of its ongoing investigation No. 332–478, *U.S.-China Trade: Implications of U.S.-Asia-Pacific Trade and Investment Trends*. The report in that investigation will be the third in the series of three reports, and the Committee has extended the transmittal date to May 29, 2009. The Commission will issue a notice amending the scope and announcing the schedule for that investigation at a later date.

As requested by the Committee in its letter of May 23, 2007, the Commission in its second report will build on the report in its first China investigation under the revised schedule (Investigation No. 332–492) by comprehensively cataloguing and where possible, quantifying the government policies and interventions described in the first report in specific sectors. The Commission will include case studies on sectors where leading U.S. exports have not penetrated the Chinese market, and on sectors which are the primary drivers of the U.S.-China trade deficit. The report will also include case studies on sectors where government policies and interventions are prevalent, including the semiconductor, telecommunications, banking, textiles and apparel, steel, automotive parts, and aircraft sectors. Where applicable, the case studies will describe how Chinese policies and actions are exacerbating existing global overcapacity in specific
