BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP07-390-000]

Enstor Houston Hub Storage and Transportation, L.P.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Houston Hub Project and Request for Comments on Environmental Issues

July 20, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Houston Hub Project involving construction and operation of a new salt dome cavern gas storage project and pipelines by Enstor Houston Hub Storage and Transportation, L.P. (Enstor) at the North Dayton Salt Dome in Liberty County, Texas.¹ This EA will be used by the Commission in its

decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Enstor provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (<http://www.ferc.gov>).

Summary of the Proposed Project

Enstor is proposing to construct four solution-mined caverns with an initial total storage capacity of 16 billion cubic feet (Bcf) of working gas, supported by 8.7 Bcf of pad gas. Upon completion of solution mining, the caverns would be taken out of service one at a time for additional solution mining to increase the capacity of each of the four storage caverns by 7.5 Bcf for a total volume of 30 Bcf of working gas and 16.3 Bcf of pad gas. The project would be capable of injecting about 600 MMcf per day and provide a nominal withdrawal of 1 Bcf per day. Enstor seeks authority to construct and operate in Liberty County, Texas:

- Four solution-mined gas storage salt caverns;
- Five brine disposal wells and associated 20-inch-diameter brine disposal pipeline;
- Five raw water wells and associated 20-inch-diameter raw water pipeline;
- 31,600 horse-power compressor station;
- Two interconnects and meter stations;
- 2.3 miles of dual 24-inch-diameter pipeline;
- Ancillary facilities including dehydration equipment, pressure reducing station, withdrawal separator with slug catcher; and

- 138-kilo-volt (kv):34-kv power drop substation, 24-kv power drop and associated electric power lines.

The location of the project facilities is shown in Appendix 1.²

Land Requirements for Construction

Construction of the proposed facilities would require about 238.4 acres of land. Following construction, about 180.2 acres would be maintained as new aboveground facility sites and permanent rights-of-way.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. This process is referred to as "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission staff requests public comments on the scope of the issues to address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

In the EA we³ will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- geology and soils.
- land use.
- water resources, fisheries, and wetlands.
- cultural resources.
- vegetation and wildlife.
- endangered and threatened species.
- air quality and noise.
- hazardous waste.
- public safety.

We will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or

² The appendices referenced in this notice are not being printed in the **Federal Register**. Copies of all appendices, other than Appendix 1 (maps), are available on the Commission's Web site at the "eLibrary" link or from the Commission's Public Reference Room, 888 First Street, N.E., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

³ "We", "us", and "our" refer to the environmental staff of the Office of Energy Projects (OEP).

¹ Enstor's application was filed with the Commission under Section 7 of the Natural Gas Act.

avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section below.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentator, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal, and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your letter to: Kimberly D. Bose, Acting Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426
- Label one copy of the comments for the attention of Gas Branch 3.
- Reference Docket No. CP07-390-000.
- Mail your comments so that they will be received in Washington, DC on or before August 22, 2007.

The Commission strongly encourages electronic filing of any comments or interventions or protests to this proceeding. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at <http://www.ferc.gov> under the "e-Filing" link and the link to the User's Guide. Before you can file comments you will need to create a free account which can be created on-line.

We may mail the EA for comment. If you are interested in receiving it, please return the Information Request (Appendix 3). If you do not return the Information Request, you will be taken off the mailing list.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding, or "intervenor". To become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214). Intervenor has the right to seek rehearing of the Commission's decision. Motions to Intervene should be electronically submitted using the Commission's eFiling system at <http://www.ferc.gov>. Persons without Internet access should send an original and 14 copies of their motion to the Secretary of the Commission at the address indicated previously. Persons filing Motions to Intervene on or before the comment deadline indicated above must send a copy of the motion to the Applicant. All filings, including late interventions, submitted after the comment deadline must be served on the Applicant and all other intervenors identified on the Commission's service list for this proceeding. Persons on the service list with e-mail addresses may be served electronically; others must be served a hard copy of the filing.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

Environmental Mailing List

An effort is being made to send this notice to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project. This includes all landowners who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within distances defined in the Commission's regulations of certain aboveground facilities. By this notice we are also asking governmental agencies, especially those in Appendix 2, to express their interest in becoming cooperating agencies for the preparation of the EA.

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at 1-866-208-FERC or on the FERC Internet Web site (<http://www.ferc.gov>) using the eLibrary link. Click on the eLibrary link, click on "General Search" and enter the docket number excluding

the last three digits in the Docket Number field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at 1-866-208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission now offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries and direct links to the documents. Go to www.ferc.gov/esubscribenow.htm.

Finally, public meetings or site visits will be posted on the Commission's calendar located at <http://www.ferc.gov/EventCalendar/EventsList.aspx> along with other related information.

Kimberly D. Bose,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP07-8-001 and CP07-8-002]

Guardian Pipeline, L.L.C.; Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Guardian Pipeline, L.L.C.'s Amended Guardian Expansion/Extension Project and Request for Comments on Environmental Issues

July 20, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) is in the process of preparing an environmental impact statement (EIS) that will address the environmental impacts of the Guardian Expansion/Extension Project (G-II) proposed by Guardian Pipeline, L.L.C. (Guardian). The Commission will use the EIS in its decision-making process to determine whether or not to authorize the project. A Draft EIS (DEIS) for the G-II Project was issued on April 13, 2007.

This notice announces the opening of a comment period to gather input from the public and interested agencies on amendments that Guardian has made to its proposed G-II Project in filings with the Commission dated April 25, 2007 and July 2, 2007. Each of these
