Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make

protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP07-390-000]

Enstor Houston Hub Storage and Transportation, L.P.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Houston Hub Project and Request for Comments on Environmental Issues

July 20, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Houston Hub Project involving construction and operation of a new salt dome cavern gas storage project and pipelines by Enstor Houston Hub Storage and Transportation, L.P. (Enstor) at the North Dayton Salt Dome in Liberty County, Texas.¹ This EA will be used by the Commission in its

decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Enstor provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (<http://www.ferc.gov>).

Summary of the Proposed Project

Enstor is proposing to construct four solution-mined caverns with an initial total storage capacity of 16 billion cubic feet (Bcf) of working gas, supported by 8.7 Bcf of pad gas. Upon completion of solution mining, the caverns would be taken out of service one at a time for additional solution mining to increase the capacity of each of the four storage caverns by 7.5 Bcf for a total volume of 30 Bcf of working gas and 16.3 Bcf of pad gas. The project would be capable of injecting about 600 MMcf per day and provide a nominal withdrawal of 1 Bcf per day. Enstor seeks authority to construct and operate in Liberty County, Texas:

- Four solution-mined gas storage salt caverns;
- Five brine disposal wells and associated 20-inch-diameter brine disposal pipeline;
- Five raw water wells and associated 20-inch-diameter raw water pipeline;
- 31,600 horse-power compressor station;
- Two interconnects and meter stations;
- 2.3 miles of dual 24-inch-diameter pipeline;
- Ancillary facilities including dehydration equipment, pressure reducing station, withdrawal separator with slug catcher; and

- 138-kilo-volt (kv):34-kv power drop substation, 24-kv power drop and associated electric power lines.

The location of the project facilities is shown in Appendix 1.²

Land Requirements for Construction

Construction of the proposed facilities would require about 238.4 acres of land. Following construction, about 180.2 acres would be maintained as new aboveground facility sites and permanent rights-of-way.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. This process is referred to as "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission staff requests public comments on the scope of the issues to address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

In the EA we³ will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- geology and soils.
- land use.
- water resources, fisheries, and wetlands.
- cultural resources.
- vegetation and wildlife.
- endangered and threatened species.
- air quality and noise.
- hazardous waste.
- public safety.

We will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or

² The appendices referenced in this notice are not being printed in the **Federal Register**. Copies of all appendices, other than Appendix 1 (maps), are available on the Commission's Web site at the "eLibrary" link or from the Commission's Public Reference Room, 888 First Street, N.E., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

³ "We", "us", and "our" refer to the environmental staff of the Office of Energy Projects (OEP).

¹ Enstor's application was filed with the Commission under Section 7 of the Natural Gas Act.
