

(5) Do you use Coast Guard HF radio Simplex Teletype over Radio (SITOR) (also known as Narrow Band Direct printing (NBDP)) to receive marine weather forecasts? (Yes or No) If yes, how often do you use Coast Guard SITOR radio broadcasts and how critical are they to your safety and operation as compared to the other sources you listed in your response to Question 2?

(6) What alternative source(s) for obtaining marine weather forecasts would you pursue if Coast Guard HF broadcasts were no longer available? How would you rate the alternative source(s) in terms of (a) user cost and (b) usefulness of the information as compared to the Coast Guard HF broadcast it replaces?

(7) Would the loss of Coast Guard HF marine weather broadcasts affect you? Please explain.

(8) How far seaward does your vessel primarily operate? (For example, coastal (0–25 nautical miles (nm) seaward); offshore (25–200 nm seaward); or, high seas (more than 200 nm seaward.) In what geographic area(s) do you generally operate your vessel? (For example, mid-Atlantic, New England, North Central Pacific, Hawaii, Gulf of Mexico, etc.)

As noted previously, comments regarding these questions, and any other pertinent matters brought to our attention during the comment period, will be taken into account in our future actions regarding the issues raised by these questions.

Dated: April 18, 2007.

**C.S. Johnson, JR.,**

*Captain, U.S. Coast Guard, Acting Assistant Commandant for Command, Control, Communications, Computers and Information Technology.*

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### Draft Recovery Plan for the Northern Spotted Owl (*Strix occidentalis caurina*)

**AGENCY:** U.S. Fish and Wildlife Service, Interior.

**ACTION:** Notice of document availability for review and comment.

**SUMMARY:** We, the U.S. Fish and Wildlife Service, announce the availability of the Draft Recovery Plan for the Northern Spotted Owl (*Strix occidentalis caurina*) (northern spotted owl) for public review and comment.

**DATES:** Comments on the draft recovery plan must be received on or before June 25, 2007. We will also conduct four public meetings in order to receive oral comments about this plan. For dates, times, and locations, please refer to the **SUPPLEMENTARY INFORMATION** section of this notice.

**ADDRESSES:** Comments on the plan can be sent electronically to

[NSOplan@fws.gov](mailto:NSOplan@fws.gov), or mailed to NSO Recovery Plan, U.S. Fish and Wildlife Service, Ecological Services, 911 NE., 11th Avenue, Portland, Oregon 97232. Copies of the draft recovery plan will be available by request from the same Portland address (telephone: 503–231–2194). An electronic copy of the draft recovery plan is also available at: <http://www.fws.gov/pacific/ecoservices/endangered/recovery/plans.html>.

**FOR FURTHER INFORMATION CONTACT:** Paul Phifer, Northern Spotted Owl Recovery Plan Project Manager, at the Portland address identified above (telephone 503–724–1886, fax 503–231–2050).

**SUPPLEMENTARY INFORMATION:**

#### Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program. The Endangered Species Act (16 U.S.C. 1531 *et seq.*) (ESA) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Recovery plans help guide the recovery effort by describing actions considered necessary for the conservation of the species, establishing criteria for downlisting or delisting listed species, and estimating time and cost for implementing the measures needed for recovery.

Section 4(f) of the ESA requires that public notice, and an opportunity for public review and comment, be provided during recovery plan development. We will consider all information presented during the public comment period. Substantive comments on the recovery needs of the species or other aspects of recovery plan development may result in changes to the recovery plan. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal agencies or other entities so that they can take these comments into account during the course of implementing recovery actions. Individual responses to comments will not be provided.

The northern spotted owl inhabits structurally complex forests from southwest British Columbia through the Cascade Mountains and coastal ranges in Washington, Oregon, and California, as far south as Marin County. When the northern spotted owl was listed under the ESA as a threatened species on June 26, 1990, the major threats were identified as widespread loss and
