BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP07-325-000]

Equitrans, L.P.; Notice of Technical Conference

April 20, 2007.

Take notice that the Commission will convene a technical conference in the above referenced proceeding on Friday, May 4, 2007, at 10 a.m. (EDT), in a room to be designated at the offices of the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

The Commission's March 29, 2007 order¹ directed that a technical conference be held to address the issues raised by a March 1, 2007 filing of Equitrans, L.P. (Equitrans) to institute a surcharge to recover certain costs incurred by Equitrans under the Pipeline Safety Improvement Act of 2002 (PSIA).

The parties and the Commission Staff will have the opportunity to discuss all of the issues raised by the filing including, but not limited to, the validity of the costs Equitrans seeks to recover and the underlying support for these costs.

FERC conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations please send an e-mail to accessibility@ferc.gov or call toll free (866) 208-3372 (voice) or 202-502-8659 (TTY), or send a fax to 202-208-2106 with the required accommodations.

All interested persons are permitted to attend. For further information please contact Lisa T. Long by phone at (202) 502-8691 or via e-mail at lisa.long@ferc.gov.

Kimberly D. Bose,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Sunshine Act; Notice of Meeting, Notice of Vote, Explanation of Action Closing Meeting and List of Persons To Attend

April 19, 2007.

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. 552b:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

DATE AND TIME: April 26, 2007, 9:30 a.m.

PLACE: Room 2C, Commission Meeting Room, 888 First Street, NE., Washington, DC 20426.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Non-Public, Investigations and Inquiries, Enforcement Related Matters.

FOR FURTHER INFORMATION CONTACT:

Kimberly D. Bose, Secretary, Telephone (202) 502-8400.

Chairman Kelliher and Commissioners Kelly, Spitzer, Moeller, and Wellinghoff voted to hold a closed meeting on April 26, 2007. The certification of the General Counsel explaining the action closing the meeting is available for public inspection in the Commission's Public Reference Room at 888 First Street, NE., Washington, DC 20426.

The Chairman and the Commissioners, their assistants, the Commission's Secretary, the General Counsel and members of his staff, and a stenographer are expected to attend the meeting. Other staff members from the Commission's program offices who will advise the Commissioners in the matters discussed will also be present.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8306-1]

Office of Research and Development; Ambient Air Monitoring Reference and Equivalent Methods: Designation of a New Equivalent Method

AGENCY: Environmental Protection Agency.

ACTION: Notice of the designation of a new equivalent method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated, in accordance with 40 CFR part 53, a new equivalent method for measuring concentrations of ozone (O₃) in the ambient air.

FOR FURTHER INFORMATION CONTACT:

Elizabeth Hunike, Human Exposure and Atmospheric Sciences Division (MD-D205-03), National Exposure Research Laboratory, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: (919) 541-3737, e-mail: Hunike.Elizabeth@epa.gov.

SUPPLEMENTARY INFORMATION:

In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQSs) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference methods or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining attainment of the NAAQSs.

The EPA hereby announces the designation of a new equivalent method for measuring concentrations of O₃ in the ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on December 18, 2006 (71 FR 61271).

The new equivalent method is an automated method (analyzer) that utilizes a measurement principle based on absorption of ultraviolet light by ozone at a wavelength of 254 nm. The newly designated equivalent method is identified as follows:

EQOA-0407-165, "Tanabyte Models 722, 723, 724, 725, or 726 Ambient Ozone Analyzer," enclosed in either a Dual-Bay Chassis or a Single-Bay Chassis and operated on either the 0-0.5 ppm or 0-1.0 ppm measurement range, within an ambient temperature range of 20 to 30 degrees C, and with a sample inlet particulate filter installed in the sample filter holder.

An application for an equivalent method determination for the candidate method based on this ozone analyzer was received by the EPA on January 19, 2007. The sampler is commercially available from the applicant, Tanabyte Engineering, Inc., 1210 West Burbank Boulevard, Suite B, Burbank, CA 91506.

A test analyzer representative of this method has been tested in accordance with the applicable test procedures specified in 40 CFR part 53 (as amended on December 18, 2006). After reviewing the results of those tests and other

¹ *Equitrans, L.P.*, 118 FERC ¶ 61,258 (2007).

information submitted by the applicant in the application, EPA has determined, in accordance with part 53, that this method should be designated as an equivalent method. The information submitted by the applicant in the application will be kept on file, either at EPA's National Exposure Research Laboratory, Research Triangle Park, North Carolina 27711 or in an approved archive storage facility, and will be available for inspection (with advance notice) to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference or equivalent method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the applicable designation method description (see the identifications of the method above).

Use of the method should also be in general accordance with the guidance and recommendations of applicable sections of the "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I," EPA/600/R-94/038a and "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, Part 1," EPA-454/R-98-004 (available at <http://www.epa.gov/ttn/amtic/qabook.html>). Vendor modifications of a designated reference or equivalent method used for purposes of part 58 are permitted only with prior approval of the EPA, as provided in part 53. Provisions concerning modification of such methods by users are specified under Section 2.8 (Modifications of Methods by Users) of Appendix C to 40 CFR part 58.

In general, a method designation applies to any sampler or analyzer which is identical to the sampler or analyzer described in the application for designation. In some cases, similar samplers or analyzers manufactured prior to the designation may be upgraded or converted (e.g., by minor modification or by substitution of the approved operation or instruction manual) so as to be identical to the designated method and thus achieve designated status. The manufacturer should be consulted to determine the feasibility of such upgrading or conversion.

Part 53 requires that sellers of designated reference or equivalent method analyzers or samplers comply with certain conditions. These conditions are specified in 40 CFR 53.9 and are summarized below:

(a) A copy of the approved operation or instruction manual must accompany the sampler or analyzer when it is delivered to the ultimate purchaser.

(b) The sampler or analyzer must not generate any unreasonable hazard to operators or to the environment.

(c) The sampler or analyzer must function within the limits of the applicable performance specifications given in 40 CFR parts 50 and 53 for at least one year after delivery when maintained and operated in accordance with the operation or instruction manual.

(d) Any sampler or analyzer offered for sale as part of a reference or equivalent method must bear a label or sticker indicating that it has been designated as part of a reference or equivalent method in accordance with part 53 and showing its designated method identification number.

(e) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(f) An applicant who offers samplers or analyzers for sale as part of a reference or equivalent method is required to maintain a list of ultimate purchasers of such samplers or analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the method has been canceled or if adjustment of the sampler or analyzer is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(g) An applicant who modifies a sampler or analyzer previously designated as part of a reference or equivalent method is not permitted to sell the sampler or analyzer (as modified) as part of a reference or equivalent method (although it may be sold without such representation), nor to attach a designation label or sticker to the sampler or analyzer (as modified) under the provisions described above, until the applicant has received notice under 40 CFR part 53.14(c) that the original designation or a new designation applies to the method as modified, or until the applicant has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the sampler or analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Human Exposure and Atmospheric Sciences Division (MD-E205-01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this new equivalent method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR part 58. Questions concerning the commercial availability or technical aspects of the method should be directed to the applicant.

Jewel F. Morris,

Acting Director, National Exposure Research Laboratory.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8306-3]

Reissuance of General NPDES Permit (GP) for Alaskan Small Suction Dredging (Permit Number AKG-37-5000)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final notice of reissuance of a general permit.

SUMMARY: On June 4, 2007, a general permit regulating the activities of small suction dredge mining for gold placer mining operations in the State of Alaska expires. On January 16, 2007, EPA proposed to reissue this GP. There was a 45 day comment period.

On April 4, 2007, the Department of Natural Resources, Office of Project Management and Permitting agreed with EPA's consistency determination under the Alaska Coastal Management Act. The Department of Environmental Conservation certified the GP under section 401 of the Clean Water Act on April 16, 2007. EPA received several comments on the GP and has prepared a Response to Comments. EPA has determined that each facility submitting a new Notice of Intent (NOI) prior to the expiration date of the current permit will be automatically covered by the reissued GP.

DATES: The GP will be effective on June 5, 2007. Since coverage between the current GP and the reissued GP is continuous, there is no administrative extension of coverage under this GP.
