

3. Where can I get the information?

All of the information can be obtained through the Air Docket (see **ADDRESSES** section above for docket contact info). A link to the report *Changes in HCFC Consumption and Emissions from the U.S. Proposed Adjustments for Accelerating the HCFC Phaseout* will be

on the EPA Web site: <http://www.epa.gov/ozone/strathome.html>.

4. How is this action related to the U.S. phaseout of ozone-depleting substances?

The following table shows the U.S. schedule for phasing out its

consumption of HCFCs in accordance with the current terms of the Protocol for Non-Article 5 Parties.

HCFC PHASEOUT SCHEDULE

Comparison of the current Montreal Protocol schedule for Non-Article 5 Parties and United States phaseout schedules

Montreal Protocol		United States	
Year to be implemented	Percent reduction in consumption, using the cap as a baseline	Year to be implemented	Implementation of HCFC phaseout through Clean Air Act regulations
2004	35.0	2003	No production and no importing of HCFC-141b.
2010	65.0	2010	No production and no importing of HCFC-142b and HCFC-22, except for use in equipment manufactured before 1/1/2010. No production and no importing of any HCFCs, except for use as refrigerants in equipment manufactured before 1/1/2020.
2020	99.5	2020	No production and no importing of HCFC-142b and HCFC-22.
2030	100.0	2030	No production and no importing of any HCFCs.

The following table shows the current obligations for Article 5 Parties for phasing out HCFCs.

CURRENT MONTREAL PROTOCOL OBLIGATIONS FOR ARTICLE 5(l) PARTIES FOR HCFC CONSUMPTION

Year to be implemented	Obligation
2015	Establish HCFC base consumption level.
2016	Maintain HCFC base consumption level.
2040	100% reduction in base consumption level.

The proposed adjustments would accelerate the phaseout schedule for both Article 5 and non-Article 5 Parties by 10 years; would move forward the year for which non-Article 5 Parties establish a baseline and freeze consumption; would add stepwise reductions to the Article 5 Parties' schedule rather than maintaining a freeze for 25 years followed by a complete phaseout, and would follow a phaseout schedule based on the ozone-depleting potential of the various HCFCs similar to our domestic approach—called 'worst-first' or 'worst-faster'.

5. What should I consider as I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide any technical information or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at your estimate.
5. Provide specific examples to illustrate your concerns.
6. Offer alternatives.
7. Make sure to submit your comments by the comment period deadline identified.
8. To ensure proper receipt by EPA, identify the appropriate docket identification number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and **Federal Register** citation related to your comments.

6. What is EPA not taking comment on?

EPA is only accepting comments on accuracy and completeness of the information outlined in this **Federal Register** Notice and contained in the report *Changes in HCFC Consumption and Emissions from the U.S. Proposed Adjustments for Accelerating the HCFC Phaseout*. EPA is not accepting comment on the following:

- HCFC phaseout established in EPA's December 10, 1993 rulemaking (58 FR 65018),
- The allowance system for controlling HCFC production import and export, or

- The commitments of the U.S. as a Party to the Montreal Protocol.

7. What supporting documentation do I need to include in my comments?

Please provide any published studies or raw data supporting your position.

8. Will there be other opportunities to provide comment on the information?

EPA or other U.S. government agencies may decide to schedule a public meeting for stakeholders concerning the proposed adjustments or other issues that may be discussed at MOP-19 after July 27, 2007 to continue a dialogue. At this time, EPA has not scheduled such a meeting.

Dated: June 21, 2007.
