Federal Emergency Management Agency

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice; 60-day notice and request for comments; collection type extension, without change, of a currently approved collection, OMB Number: 1660-0057, Form Number(s): No forms associated with this collection.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a proposed revised information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the need to continue to collect information from the State, local and tribal government officials, businesses, and individuals residing in the immediate and surrounding areas of chemical stockpile sites.

SUPPLEMENTARY INFORMATION: The Chemical Stockpile Emergency Preparedness Program (CSEPP) is one facet of the multi-hazard readiness program in eight U.S. states that deal with hazardous material spills or releases. The program's goal is to improve preparedness to protect the people of these communities in the unlikely event of an accident. CSEPP, a cooperative effort between FEMA and the U.S. Army, provides funding (grants), training, community outreach, guidance, technical support and expertise to State, local, and tribal governments to improve their capabilities to prepare for and respond to this type of disaster. Since no preparedness program can be successful without the public's understanding and cooperation, input from the residents and businesses of immediate and/or surrounding areas is vital for program managers' ability to design custom-tailored strategies to educate and communicate risks and action plans at the local level. This survey, which was initiated six years ago, will continue as the assessment mechanism to document

and quantify program achievements. There are two authorities supporting this information collection: (1) The Government Performance Results Act of 1993 (GPRA), which mandates federal agencies to provide valid and reliable quantification of program achievements, and (2) Executive Order 12862, which requires agencies to survey customers to determine their level of satisfaction with existing services.

Collection of Information

Title: Chemical Stockpile Emergency Preparedness Program (CSEPP) Evaluation and Customer Satisfaction Survey.

Type of Information Collection: Extension of a currently approved collection.

OMB Number: OMB 1660-0057.

Form Numbers: None associated with this collection.

Abstract: Consistent with performance measurement requirements set forth by the Government Performance Results Act, the Chemical Stockpile Preparedness Program (CSEPP) will continue collecting data from state, local and tribal governments, individuals and businesses residing in the immediate or surrounding areas of eight chemical stockpile sites. This study will: (1) Assess program effectiveness using five national performance indicators unique to the CSEPP program, (2) measure and monitor customer satisfaction with CSEPP products and services, and (3) identify weaknesses and strengths of individual sites and program components. Data findings will be used to set customer service standards, while providing quantitative benchmarks for program monitoring and evaluation.

Affected Public: State and local officials; individuals; businesses.

Background

The Department of Homeland Security (DHS), through the United States Coast Guard and the Transportation Security Administration (TSA), issued a joint final rule (72 FR 3492; January 25, 2007) pursuant to the Maritime Transportation Security Act (MTSA), Public Law 107-295, 116 Stat. 2064 (November 25, 2002), and the Security and Accountability for Every Port Act of 2006 (SAFE Port Act), Public Law 109-347 (October 13, 2006). This rule requires all credentialed merchant mariners and individuals with unescorted access to secure areas of a regulated facility or vessel to obtain a TWIC. In this final rule, on page 3510, TSA and Coast Guard stated that a phased enrollment approach based upon risk assessment and cost/benefit would be used to implement the program nationwide, and that TSA would publish a notice in the **Federal Register** indicating when enrollment at a specific location will begin and when it is expected to terminate.
