BILLING CODE 4510-24-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed
petitions to modify the application of
existing safety standards under section
101(c) of the Federal Mine Safety and
Health Act of 1977.

1. Dakota Westmoreland Corporation

[Docket No. M-2004-018-C]

Dakota Westmoreland Corporation,
P.O. Box 39, Beulah, North Dakota
58523-0039 has filed a petition to
modify the application of 30 CFR
77.1607(u) (Loading and haulage
equipment; operation) to its Beulah
Mine (MSHA I.D. No. 32-00043) located
in Mercer County, North Dakota. The
petitioner proposes to use a portable
hydraulic unit (power pack) to tow large
trucks in lieu of using a tow bar and
safety chain. The petitioner states that
qualified operators and mechanics
would be task trained to perform the

installations of the power pack, and if
anything fails, the haul trucks' brakes
would automatically set up and all
towing procedures would be stopped.
The petitioner asserts that the proposed
alternative method would not result in
a diminution of safety to the miners.

2. Oak Grove Resources, LLC

[Docket No. M-2004-019-C]

Oak Grove Resources, LLC, Gateway
Center, Suite 1340, 401 Liberty Avenue,
Pittsburgh, Pennsylvania 1522 has filed
a petition to modify the application of
30 CFR 75.507 (Power connection
points) to its Oak Grove Mine (MSHA
I.D. No. 01-00851) located in Jefferson
County, Alabama. The petitioner
requests a modification of the existing
standard to permit the use of high-
voltage submersible pumps in boreholes
into an area of the Oak Grove Mine
where water has accumulated. The
petitioner proposes to equip the pumps
with probes to determine a high and low
water level. The probes will consist of
redundant electronic pressure
transducers that are suitable for
submersible pump control application.
The probe circuits will be protected by
a MSHA approved intrinsically safe
barrier. The pump electric control will
be designed and installed so that the
pump will not start manually or
automatically if water is below the low
water probe level, the pump will cease
operation when the water level is lower
than the low water probe, and the pump
will start operation when the water level
reaches the high water probe. The
petitioner has listed in this petition
additional terms and conditions that
would be implemented when using the
proposed alternative method. The
petitioner asserts that the proposed
alternative method would provide at
least the same measure of protection as
the existing standard.
