Title of Proposal: Survey of Neighborhood Networks Centers—Amended Title: Neighborhood Networks Data Collection Management and Tracking Data Collection Instruments.

OMB Control Number, if applicable: 2502-0553.

Description of the need for the information and proposed use: Launched by HUD's Office of Multifamily Housing Programs in September 1995, Neighborhood Networks is a community-based initiative that encourages the development of resource and community technology centers in HUD insured and assisted housing. In 2003, HUD conducted a national survey of Neighborhood Networks center directors to document center characteristics and identify commonalities and trends to guide the direction of the Neighborhood Networks initiative.

The Office of Multifamily Housing Programs is requesting clearance for a more comprehensive data collection instrument in 2004. The data collection is designed with the objective of merging information currently captured in a paper business plan with data currently collected through the survey of center directors. This approach will be a multi-step iterative process as the business plan is evolving from a paper submission to an enhanced and more comprehensive online tool known as START—the Strategic Tracking and Reporting Tool. Once the transition is complete, START will be the mechanism by which all center data are collected.

Agency form numbers, if applicable: None.

Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response: There are approximately 1200 Neighborhood Networks Centers located in HUD insured and assisted housing properties. The hourly burden per respondent for the one-time telephone survey is estimated at 40 minutes. The hourly burden for referencing and completing the Data Collection Worksheet (if necessary) is estimated at 30 minutes. The survey response rate is estimated at 70 percent, resulting in an overall response burden of 560 hours for the telephone survey.
