

SUPPLEMENTARY INFORMATION:**I. Abstract**

In order to address the National Environmental Policy Act (NEPA) and Magnuson-Stevens Fishery Conservation and Management Act (MSA) requirements, NOAA Fisheries social scientists must collect a broad range of social, cultural and economic information currently unavailable. NOAA Fisheries social scientists conduct social science research and apply research findings to fishery management needs. This research is designed to improve social science data related to the human dimensions of fisheries management by: (1) investigating social, cultural and economic issues/processes related to marine fishery stakeholders including but not limited to commercial and recreational fishermen, subsistence fishermen, fishing vessel owners, fishermen's families, fish processors and processing workers, related fishery support businesses, and fishing communities as defined in MSA section 3(16); (2) improving the current knowledge of baseline information related to marine fishery stakeholders, as described in (1) above; and (3) monitoring and measuring trends among marine fishery stakeholders, as described in (1) above, affected by fishery management decisions.

II. Method of Collection

Qualitative and quantitative research methods will be used to collect social, cultural and economic data. Examples of qualitative methods that will be employed are ethnographic research including participant observation, focus groups, and informal unstructured and formal structured interviews. Examples of quantitative methods that will be used include in-person, mail and phone surveys and questionnaires.

III. Data

OMB Number: 0648-0488.

Form Number: None.

Type of Review: Regular submission.

Affected Public: Individuals and households; business or other for-profit organizations; Not-for-profit institutions; Federal Government; and State, Local or Tribal Government.

Estimated Number of Respondents: 6,000.
Estimated Time Per Response: 60 minutes (Burden hours are directly related to the type of data collection tool used. Small surveys and participant observation may require minimal burden to participants and respondents. For example a small survey could take five minutes to administer. Other

methods such as detailed surveys and informal and formal interview discussions can take much longer).

Estimated Total Annual Burden Hours: 6,000.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Requests for additional information or copies of the information collection instrument and instructions should be directed to Steven J. Koplin, F/ST1, #12456, 1315 East West Highway, Silver Spring, MD 20910-3282 (301-713-2328).

SUPPLEMENTARY INFORMATION:**I. Abstract**

NOAA, on an annual basis, collects information from seafood and industrial fishing processing plants on the volume and value of their processed fishery products and their monthly employment figures. Monthly, NOAA collects information on the production of fishmeal and oil. The information gathered is used by NOAA in the economic and social analyses used when proposing and evaluating fishery management actions.

II. Method of Collection

In the current survey, NOAA Fisheries provides each processor a pre-printed form that includes the products produced by the dealer in the previous year. The dealer only needs to fill in the quantities, and add any new products, before returning the form every year. Processors have the option to use a web-based application that allows them to submit the data electronically.

III. Data

OMB Number: 0648-0018.

Form Number: NOAA Forms 88-13, 88-13C.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,320.

SUPPLEMENTARY INFORMATION:

I. Abstract

Regulations at 50 CFR 648.8 and 697.8 require that vessels, over 25 ft (7.6 m) in registered length with Federal permits to fish in the Northeast, display the vessel's name and official number. The name and number must be of a specific size at specified locations. The vessel's name must be affixed to the port and starboard sides of the bow and, if possible, on its stern. The official number must be displayed on the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck so as to be clearly visible from enforcement vessels and aircraft that aids in fishery law enforcement.

II. Method of Collection

No information is submitted to NOAA Fisheries as a result of this collection.
