

SUMMARY: ACCSH will meet October 19–20, 2004, in Washington, DC. This meeting is open to the public.

TIME AND DATE: ACCSH will meet from 8:30 a.m. to 4:30 p.m., Tuesday, October 19, 2004, and 8:30 a.m. to noon, Wednesday, October 20, 2004.

PLACE: ACCSH will meet at the U.S. Department of Labor, Frances Perkins Building, Room N3437A/B/C, 200 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: For general information about ACCSH and ACCSH meetings: Michael Buchet, OSHA, Directorate of Construction, Room N–3468, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone 202–693–2020. For information about submission of comments, requests to speak, and the need for special accommodations for the meeting: Veneta Chatmon, OSHA, Office of Public Affairs, Room N–3647, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone 292–693–1999. Individuals needing special accommodations should contact Ms. Chatmon no later than October 4, 2004. Electronic copies of this **Federal Register** notice, as well as information about ACCSH workgroups and other relevant documents, are available at OSHA's Webpage on the Internet at <http://www.osha.gov>.

SUPPLEMENTARY INFORMATION: ACCSH will meet October 19–20, 2004, in Washington, DC. The agenda for this meeting includes:

- Remarks—Office of the Assistant Secretary—OSHA.
- Welcome to new members.
- Hispanic Summit Report.
- Standards Update.
- Work Group Assignments/Reports.
- Partnership and Alliance Update.
- Public Comment (During this

period, any member of the public is welcome to address ACCSH about construction-related safety and health issues. See information below to request time to speak at the meeting.)

All ACCSH meetings are open to the public. An official record of the meeting will be available for public inspection at the OSHA Docket Office, Room N–2625, at the address above, telephone (202) 693–2350. Electronic copies of this **Federal Register** notice, as well as information about ACCSH workgroups and other relevant documents, are available at OSHA's Web page on the Internet at <http://www.osha.gov>.

Interested parties may submit written data, views or comments, preferably with 20 copies, to Ms. Chatmon, at the address above. OSHA will provide

submissions received prior to the meeting to ACCSH members and will include each submission in the record of the meeting. Attendees may also request to make an oral presentation by notifying Veneta Chatmon before the meeting at the address above. The request must state the amount of time desired, the interest represented by the presenter (e.g., the name of the business or organization), if any, and a brief outline of the presentation. The Chair of ACCSH may grant the request at his discretion and as time permits.

ACCSH Work Groups

The ACCSH Excavation work group will meet from 8:30 a.m.–4:30 p.m. Tuesday, September 28, 2004 in Room N3437A/B/C of the Frances Perkins Building at the address above.

The ACCSH Tower Erection work group will meet from 1 p.m.–4:30 p.m., Monday, October 18, 2004, in Room N3437A/B of the Frances Perkins Building at the address above. Work group meetings are open to the public. For further information on ACCSH work group meetings or on participating on ACCSH work groups, please contact Michael Buchet at the address above or look on the ACCSH page on OSHA's Web page at <http://www.osha.gov>.

Authority: John L. Henshaw, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice under the authority granted by section 7 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656), section 107 of the Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 333), and Secretary of Labor's Order No. 5–2002 (67 FR 65008).

Signed at Washington, DC this 15th day of September, 2004.

John L. Henshaw,

Assistant Secretary of Labor.

BILLING CODE 4510–26–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–315 and 50–316]

Indiana Michigan Power Company Donald C. Cook Nuclear Plant; Notice of Availability of the Draft Supplement 20 to the Generic Environmental Impact Statement and Public Meeting for the License Renewal of Donald C. Cook Nuclear Plant, Units 1 and 2

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has published a draft plant-specific supplement to the Generic Environmental Impact Statement (GEIS), NUREG–1437,

regarding the renewal of operating licenses DPR–58 and DPR–74 for an additional 20 years of operation at Donald C. Cook Nuclear Plant, Units 1 and 2 (CNP). CNP is located in Berrien County, Michigan, about 55 miles east of Chicago, Illinois. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

The draft Supplement to the GEIS is available for public inspection in the NRC Public Document Room (PDR) located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, 20852 or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the PDR reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to pdr@nrc.gov. In addition, the Bridgman Public Library, 4460 Lake Street, Bridgman, Michigan and the Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan have agreed to make the draft plant-specific supplement to the GEIS available for public inspection.

Any interested party may submit comments on the draft supplement to the GEIS for consideration by the NRC staff. To be certain of consideration, comments on the draft supplement to the GEIS and the proposed action must be received by December 8, 2004. Comments received after the due date will be considered if it is practical to do so, but the NRC staff is able to assure consideration only for comments received on or before this date. Written comments on the draft supplement to the GEIS should be sent to: Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, Mailstop T–6D59, U.S. Nuclear Regulatory Commission, Washington, DC, 20555–0001.

Comments may be hand-delivered to the NRC at 11545 Rockville Pike, Room T–6D59, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m. on Federal workdays. Electronic comments may be submitted to the NRC by e-mail at CookEIS@nrc.gov. All comments received by the Commission, including those made by Federal, State, and local agencies, Native American Tribes, or other interested persons, will be made available electronically at the Commission's PDR in Rockville,

Maryland, and from the PARS component of ADAMS.

The NRC staff will hold two public meetings to present an overview of the draft plant-specific supplement to the GEIS and to accept public comments on the document. The public meetings will be held on November 9, 2004, at the Lake Charter Township Hall, 3220 Shawnee Road, Bridgman, Michigan. The first session will convene at 1:30 p.m. and will continue until 4:30 p.m., as necessary. The second session will convene at 7 p.m. with a repeat of the overview portions of the meeting and will continue until 10 p.m., as necessary. Both meetings will be transcribed and will include: (1) A presentation of the contents of the draft plant-specific supplement to the GEIS, and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft report. Additionally, the NRC staff will host informal discussions one hour before the start of each meeting at the Lake Charter Township Hall. No comments on the draft supplement to the GEIS will be accepted during the informal discussions. To be considered, comments must be provided either at the transcribed public meetings or in writing, as discussed below. Persons may register to attend or present oral comments at the meetings by contacting Mr. Robert Schaaf, by telephone at 1-800-368-5642, extension 1312, or by e-mail at CookEIS@nrc.gov no later than November 3, 2004. Members of the public may also register to speak at the meeting within 15 minutes of the start of each session. Individual oral comments may be limited by the time available, depending on the number of persons who register. Members of the public who have not registered may also have an opportunity to speak, if time permits. If special equipment or accommodations are needed to attend or present information at the public meeting, Mr. Schaaf will need to be contacted no later than November 1, 2004, so that the NRC staff can determine whether the request can be accommodated.

FOR FURTHER INFORMATION, CONTACT: Mr. Robert Schaaf, License Renewal and Environmental Impacts Program, Division of Regulatory Improvement Programs, U.S. Nuclear Regulatory Commission, Washington, DC, 20555-0001. Mr. Schaaf may be contacted at the aforementioned telephone number or e-mail address.

Dated at Rockville, Maryland, this 8th day of September, 2004.

For the Nuclear Regulatory Commission.

Pao-Tsin Kuo,

Program Director, License Renewal and Environmental Impacts Program, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Notice of Clarification to Steam Generator Tube Integrity Event Reporting Guideline in NUREG-1022, "Event Reporting Guidelines 10 CFR 50.72 and 50.73"

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of clarification in reporting guideline for steam generator tube integrity event.

SUMMARY: The U.S. Nuclear Regulatory Commission has made a clarification in the reporting guideline for serious steam generator tube degradation contained within Revision 2 to NUREG-1022, "Event Reporting Guidelines 10 CFR 50.72 and 50.73." The NRC will issue an errata to NUREG-1022, Revision 2. The purpose of this clarification is to ensure that the NRC receives timely notification of serious steam generator tube degradation.

SUPPLEMENTARY INFORMATION: On February 18, 2004, the NRC staff issued a **Federal Register** notice (69 FR 7661) that requested comments on the staff's intent to issue errata to Revision 2 of NUREG-1022, "Event Reporting Guidelines 10 CFR 50.72 and 50.73." The errata would indicate that steam generator tube degradation is considered serious if either of the two criteria specified in Section 3.2.4(A)(3) of NUREG-1022, Revision 2, is not satisfied.

Steam generator tube degradation is currently characterized in Section 3.2.4(A)(3) of NUREG-1022 as being seriously degraded if the tubing fails to meet the following two performance criteria:

(A) Steam generator tubing shall retain structural integrity over the full range of normal operating conditions (including startup, operation in the power range, hot standby, and cooldown and all anticipated transients included in the design specification) and design basis accidents. This includes retaining a margin of 3.0 against burst under normal steady state full power operation and a margin of 1.4 against burst under the limiting design

basis accident concurrent with a safe shutdown earthquake.

(B) The primary to secondary accident induced leakage rate for the limiting design basis accident, other than a steam generator tube rupture, shall not exceed the leakage rate assumed in the accident analysis in terms of total leakage rate for all steam generators and leakage rate for an individual steam generator. The licensing basis accident analyses typically assume a 1 gallon per minute primary to secondary leak rate per steam generator, except for specific types of degradation at specific locations where the tubes are confined, as approved by the NRC and enumerated in conjunction with the list of approved repair criteria in the licensee's design basis documents.

The first performance criterion is commonly referred to as the structural integrity performance criterion and the second criterion is commonly referred to as the accident induced leakage performance criterion. As written, NUREG-1022 could be read to indicate that the principal safety barrier (*i.e.*, the steam generator tubes in this case) would only be considered seriously degraded if it had neither structural nor leakage integrity. Accordingly, if the steam generator tubes lacked only one of structural or leakage integrity, they would not be considered seriously degraded. This is contradictory to existing NRC regulations which require, in part, that the reactor coolant pressure boundary (which includes the steam generator tubes) be designed to permit periodic inspection and testing of important areas and features to assess both their structural and leaktight integrity (refer to General Design Criterion 32 of Appendix A to 10 CFR part 50) and be designed and tested so as to have an extremely low probability of abnormal leakage, of rapidly propagating failure, and of gross rupture (refer to General Design Criterion 14 of Appendix A to 10 CFR part 50). The regulations, therefore, indicate that both structural and leakage integrity criteria must be satisfied, and not meeting either one of the two performance criteria should constitute serious degradation of the principal safety barrier.

In response to the **Federal Register** notice, one public comment was received from Progress Energy (ML040850494). The comment was that the notice did not indicate whether the new criteria would require the re-evaluation of the reportability of existing steam generator tube degradation that was previously evaluated based on the criteria that were in effect before issuance of the errata. The commenter also indicated that
