BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No. 2004-P-039]

Grant of Interim Extension of the Term of U.S. Patent No. 4,591,585; Atamestane

AGENCY: United States Patent and Trademark Office.

ACTION: Notice of interim patent term extension.

SUMMARY: The United States Patent and Trademark Office has issued a certificate under 35 U.S.C. 156(d)(5) for a one-year interim extension of the term of U.S. Patent No. 4,591,585.

FOR FURTHER INFORMATION CONTACT:

Karin Ferriter by telephone at (703) 306-3159; by mail marked to her attention and addressed to the Commissioner for Patents, Mail Stop Patent Ext., P.O. Box 1450, Alexandria, VA 22313-1450; by fax marked to her attention at (703) 872-9411, or by e-mail to Karin.Ferriter@uspto.gov.

SUPPLEMENTARY INFORMATION: Section 156 of title 35, United States Code, generally provides that the term of a patent may be extended for a period of up to five years if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review, and that the patent may be extended for interim periods of up to a year if the regulatory review is anticipated to extend beyond the expiration date of the patent.

On May 21, 2004, patent owner Schering Aktiengesellschaft, timely filed an application under 35 U.S.C. 156(d)(5) for an interim extension of the term of

U.S. Patent No. 4,591,585. The patent claims the product atamestane. The application indicates that a New Drug Application for the human drug product atamestane has been filed and is currently undergoing regulatory review before the Food and Drug Administration for permission to market or use the product commercially.

Review of the application indicates that except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156, and that the patent should be extended for one year as required by 35 U.S.C. 156(d)(5)(B). Since it is apparent that the regulatory review period will continue beyond the expiration date of the patent (June 18, 2004), interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

An interim extension under 35 U.S.C. § 156(d)(5) of the term of U.S. Patent No. 4,591,585 is granted for a period of one year from the expiration date of the patent, *i.e.*, until June 18, 2005.

Dated: June 24, 2004.

Jon W. Dudas,

Acting Under Secretary of Commerce for Intellectual Property and Acting Director of the United States Patent and Trademark Office.

BILLING CODE 3510-16-P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No. 2004-P-041]

Grant of Second Interim Extension of the Term of U.S. Patent No. 4,585,597; Ecamsule

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice of interim patent term extension.

SUMMARY: The United States Patent and Trademark Office has issued a certificate under 35 U.S.C. 156(d)(5) for a second one-year interim extension of the term of U.S. Patent No. 4,585,597.

FOR FURTHER INFORMATION CONTACT:

Karin Ferriter by telephone at (703) 306-3159; by mail addressed to Mail Stop Patent Ext., Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450; by fax at (703) 872-9411, or by e-mail to Karin.Ferriter@uspto.gov.

SUPPLEMENTARY INFORMATION: Section 156 of title 35, United States Code, generally provides that the term of a patent may be extended for a period of

up to five years if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review, and that the patent may be extended for interim periods of up to a year if the regulatory review is anticipated to extend beyond the expiration date of the patent.

On April 30, 2004, patent owner, L'Oreal S.A., timely filed an application under 35 U.S.C. 156(d)(5) for a second interim extension of the term of U.S. Patent No. 4,585,597. The patent claims the active ingredient Mexoryl™^{MSX} (ecamsule) in the human drug product ANTHELIOS™^{MSP}, a method of use of the ecamsule, and a method of manufacturing ecamsule. The application indicates, and the Food and Drug Administration has confirmed, that a New Drug Application for the human drug product ANTHELIOS™^{MSP} (ecamsule) has been filed and is currently undergoing regulatory review before the Food and Drug Administration for permission to market or use the product commercially. The patent was previously extended for a term of one year.

Review of the application indicates that, except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156. Since it is apparent that the regulatory review period will continue beyond the extended expiration date of the patent (June 16, 2004), the term of the patent is extended under 35 U.S.C. 156(d)(5) for an additional term of one year, *i.e.*, until June 16, 2005.

Dated: June 24, 2004.

Jon W. Dudas,

Acting Under Secretary of Commerce for Intellectual Property and Acting Director of the United States Patent and Trademark Office.
