

Proposed Rules

Federal Register

Vol. 69, No. 129

Wednesday, July 7, 2004

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 993

[Docket No. FV04-993-1 PR]

Dried Prunes Produced in California; Withdrawal of a Proposed Rule

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Withdrawal of proposed rule.

SUMMARY: This action withdraws a proposed rule published in the **Federal Register** on March 26, 2004 (69 FR 15736), on the establishment of an undersized prune regulation for the 2004-05 crop year under the Federal marketing order for dried prunes (order). The order regulates the handling of dried prunes produced in California and is administered locally by the Prune Marketing Committee (Committee). On June 4, 2004, the California Agriculture Statistics Service (CASS) announced its forecast for the 2004 prune harvest at 70,000 natural condition tons, 60 percent below the average production for the past five years. Based on a 70,000 ton crop, there would be insufficient dried prunes to justify a 2004-05 undersized volume regulation. Therefore, the proposed rule is being withdrawn.

EFFECTIVE DATE: July 8, 2004.

FOR FURTHER INFORMATION CONTACT: Richard P. Van Diest, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487-5901, fax: (559) 487-5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., STOP 0237, Washington, DC 20250-0237; telephone: (202) 720-2491, fax: (202) 720-8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., STOP 0237, Washington, DC 20250-0237; telephone: (202) 720-2491, fax: (202) 720-8938, or e-mail: Jay.Guerber@usda.gov.

SUPPLEMENTARY INFORMATION: Marketing Agreement and Order No. 993, both as amended (7 CFR part 993), regulate the handling of dried prunes produced in California, hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

This action withdraws a proposed rule published in the **Federal Register** on March 26, 2004 (69 FR 15736), on the establishment of an undersized prune regulation for the 2004-05 crop year for volume control purposes. The proposed rule would have required prunes passing through specified screen openings to be removed from human consumption outlets. For French prunes, the screen opening would have been increased from 23/32 to 24/32 of an inch in diameter; and for non-French prunes, the opening would have been increased from 28/32 to 30/32 of an inch in diameter. The primary intent behind this proposal was to remove the smallest, least desirable of the marketable size dried prunes to help balance the supply of dried prunes with demand. The proposed undersized regulation would have been in effect from August 1, 2004, through July 31, 2005.

Based on the CASS forecast of 70,000 natural condition tons for the 2004 prune harvest, there will be an insufficient supply of California dried prunes to meet the 2004-05 market demand (estimated at 150,000 natural condition tons). Implementation of the proposed undersized regulation would further reduce the supply of prunes entering human consumption outlets during the 2004-05 crop year and would not promote orderly marketing conditions or further marketing order marketing goals. Therefore, the proposed rule is being withdrawn.

The proposed rule regarding the establishment of an undersized regulation for dried prunes for the

2004-05 crop year, published in the **Federal Register** on March 26, 2004 (69 FR 15736), is hereby withdrawn.

RIN 2120-AA64

Airworthiness Directives; Pratt & Whitney JT9D-59A, -70A, -7Q, and -7Q3 Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede an existing airworthiness directive (AD) for Pratt & Whitney (PW) JT9D-59A, -70A, -7Q, and -7Q3 turbofan engines. That AD currently requires fluorescent penetrant inspection (FPI) of high pressure turbine (HPT) second stage airseals, part numbers (P/Ns) 5002537-01, 788945, 753187, and 807410, knife-edges for cracks, each time the engine's HPT second stage airseal is accessible. This proposed AD would require replacing each existing HPT second stage airseal with an improved design HPT second stage airseal and modifying the 2nd stage HPT vane cluster assembly and 1st stage retaining blade HPT plate assembly at next piece-part exposure, but no later than five years after the effective date of the proposed AD. These actions would be considered terminating action to the repetitive inspections required by AD 2002-10-07. This proposed AD results from the manufacturer introducing an improved design HPT second stage airseal and
