[Docket No. FAA 2004-17493; Airspace Docket 04-ANM-04]

Amendment to Class D Airspace; Ogden, Hill Air Force Base, UT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Class D airspace at Ogden, Hill Air Force Base, UT (Hill AFB) by clarifying the description of the Class D Airspace. The current airspace description could be confusing thereby making it difficult to interpret. This modification does not change the current boundaries or use of the affected airspace.

EFFECTIVE DATE: September 02, 2004.

FOR FURTHER INFORMATION CONTACT: Ed Haeseker, Air Traffic Division, Federal Aviation Administration, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (425) 227-2527.

SUPPLEMENTARY INFORMATION:

History

Current Class D airspace as described in Airspace Designations and Reporting Points Document 7400.9L dated September 02, 2003, and effective September 16, 2003, has been found to be confusing and is difficult to interpret. This clarifies that airspace description.

The Rule

This action amends Title 14 Code of Federal Regulations, part 71 (14 CFR part 71) by clarifying the description of the Class D airspace at Ogden, Hill AFB. The current airspace description is difficult to interpret. This modification does not change the current boundaries or the use of the affected airspace.

Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9L dated September 02, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11013; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 04-10636, published on Tuesday, May 11, 2004, (69 FR 26029) modified the Class E airspace area at Oshkosh, NE. The modification emended discrepancies in the dimensions and legal description of controlled airspace around Garden County Airport at Oshkosh, NE. A format error in this airspace change was later corrected in **Federal Register** Document 04-11787, published on Tuesday, May 25, 2004, (69 FR 29653). Since the above actions two area navigation (RNAV) global positioning system (GPS) standard instrument approach procedures (SIAPs) and one nondirectional radio beacon (NDB) SIAP have been developed to serve Garden County Airport. These SIAPs necessitate a further correction to Class E airspace area at Oshkosh, NE as published in the **Federal Register** on Tuesday, May 11, 2004.

■ Accordingly, pursuant to the authority delegated to me, the legal description of Oshkosh, NE Class E airspace, as published in the **Federal Register** on Tuesday, May 11, 2004, (69 FR 26029) [FR Doc. 04-10636] is corrected as follows:
