The FAA uses the direct final rulemaking procedure for a noncontroversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on August 5, 2004. # Amendment of Class E Airspace; Richmond, VA

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action amends Class E airspace at Richmond, VA. The development of multiple area navigation (RNAV) Standard Instrument Approach Procedures (SIAP) for numerous airports within the Richmond, VA metropolitan area with approved Instrument Flight Rules (IFR) operations and the resulting overlap of designated Class E–5 airspace have made this action necessary. This action consolidates the Class E–5 descriptions through separate rulemaking action. The area will be depicted on aeronautical charts for pilot reference.

**DATES:** *Effective Date:* 0901 UTC August 5, 2004.

# SUPPLEMENTARY INFORMATION:

# History

On May 11, 2004, a notice proposing to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by consolidating existing Class E-5 airspace designations in the Richmond, VA metropolitan area and incorporating those areas into the Richmond, VA description was published in the Federal Register (69 FR 26056-26057). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. The rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace area designations for airspace extending upward from the surface are published in paragraph 6005 of FAA Order 7400.9L, dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation

listed in this document will be amended in the order.

## The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) provides controlled Class E airspace extending upward from 700 ft above the surface for aircraft conducting IFR operations within the Richmond, VA Class E–5 airspace description.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
