

to assist June sucker spawning and rearing in the lower Provo River, convey water to support instream flows in Hobble Creek to assist recovery of the June sucker, and develop hydropower. It would involve construction of three new pipelines and two new hydropower plants with associated transmission lines. Under this alternative, Interior would acquire 15,000 acre-feet of the District's secondary water rights in Utah Lake to provide a firm annual yield of 15,800 acre-feet of M&I water.

No Action Alternative—No new water conveyance features would be constructed under the No Action Alternative. It would provide the delivery of 86,100 acre-feet of water from Strawberry Reservoir to Utah Lake for the Bonneville Unit M&I exchange water. The 15,800 acre-feet of Bonneville Unit water would remain in Strawberry Reservoir to provide a firm supply for the Bonneville Unit M&I exchange. Some of the Bonneville Unit M&I exchange water would be routed through the Strawberry Tunnel to meet instream flow needs in Sixth Water and Diamond Fork creeks. The remaining Bonneville Unit M&I exchange water would be conveyed through the Diamond Fork System and discharged into Diamond Fork Creek at the outlet near Monks Hollow or discharged from the Diamond Fork Pipeline into the Spanish Fork River at the mouth of Diamond Fork Canyon. The irrigation diversions on lower Spanish Fork River would be modified to bypass and measure the 86,100 acre-feet into Utah Lake, and to allow fish passage as previously agreed by the Interior and District in the 1999 Diamond Fork FS-FEIS and ROD. Interior would not purchase any of the District's secondary water rights in Utah Lake and no water would be conveyed to Hobble Creek for June sucker recovery. The No Action Alternative would be the same as the Interim Proposed Action in the Diamond Fork FS-FEIS.

Your written comments should be specific and explain the reason for any recommendation. The BLM appreciates any and all comments, but those most useful and likely to influence decisions on management and protection of wild horses and burros are those that are either supported by quantitative information or studies or those that include citations to and analysis of applicable laws and regulations. Except for comments provided in electronic format, speakers should submit two copies of their written comments where feasible. The BLM will not necessarily consider comments received after the time indicated under the **DATES** section or at locations other than that listed in the **ADDRESSES** section.
