SUPPLEMENTARY INFORMATION:

Title: Identify and Evaluate Barriers to Right-of-Way Training Needs.

Abstract: More training for individuals handling right-of-way activities for Federal and State transportation agencies is needed. The State right-of-way managers and the Federal Highway Administration (FHWA) divisions' realty offices frequently express concern to the FHWA's Office of Real Estate Services (HEPR) about the lack of training for current and new employees. Yet, it appears that these groups may underutilize existing training resources, such as courses offered through the National Highway Institute (NHI), the International Right-of-Way Association (IRWA), and the Appraisal Institute (AI). The goal of this research project is to determine whether HEPR's State and Federal customers are taking full advantage of existing training opportunities. This proposed information collection would involve responses to a questionnaire and a follow-up survey to identify and evaluate barriers to existing right-of-way training courses.

Respondents: The respondents to the survey will be the state right-of-way managers and the FHWA division realty officers in all 50 states, the District of Columbia and Puerto Rico, as well as the selected training providers at NHI, IRWA, and AI.

Frequency: This is a one-time survey.
Estimated Average Burden per Response: The estimated average burden per response is 30 minutes. This includes the time needed to complete the questionnaire and the follow-up survey.

Estimated Total Annual Burden Hours: The estimated total annual burden for all respondents is 45 hours.

Public Comments Invited: Interested parties are invited to send comments regarding any aspect of this information collection, including but not limited to: (1) The necessity and utility of the information collection for the proper performance of the functions of the FHWA; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the collected information; and (4) ways to minimize the collection burden, including the use of electronic technology without reducing the quality of the collected information. Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

SUPPLEMENTARY INFORMATION:

Title: Evaluate the Effects of Appraisal Waivers.

Abstract: The Uniform Relocation Assistance and Real Property Acquisition Properties Act of 1970, as amended, provides that "Real property shall be appraised before the initiation of negotiations, and that the owner, or the owner's designated representative shall be given an opportunity to accompany the appraiser during the appraiser's inspection of the property, except that the head of the lead agency may prescribe a procedure to waive the appraisal in cases involving the acquisition by sale or donation of property with a low fair market value." The appraisal waiver policy is based on the premise that administrative costs, particularly appraisal costs, should not be a high proportion, or even exceed the value of the actual real property to be acquired. The procedure to waive the appraisal is specified in 49 CFR 24.102(c) and allows agencies acquiring real property to " * * * determine that an appraisal is unnecessary because the valuation problem is uncomplicated and the fair market value is estimated at \$2,500 or less, based on a review of available data." The Federal Highway

Administration (FHWA) has expanded this policy through 49 CFR 24.7, Federal agency waiver of regulations, to allow the State Departments of Transportation, at their request, to raise the appraisal waiver threshold to a maximum of \$10,000 and more recently, to a maximum of \$25,000. This information collection involves a survey to determine the impact of FHWA's appraisal waiver policy on the acquisition of real property by agreements with owners, subsequent litigation (eminent domain), consistent treatment for owners, and public confidence in Federal land acquisition practices. Also, the FHWA seeks to determine the impacts that the FHWA's appraisal waiver procedures may have on the State DOTs' operations. The information to be collected will be used to determine whether the appraisal waiver policy, as implemented by the FHWA through its State Department of Transportation partners, is accomplishing its intended goals. This includes, minimizing administrative costs, expediting the acquisition of real property, avoiding litigation, and maintaining consistent treatment for owners. The information will also help identify and analyze the impact of unknown and unintended consequences of the appraisal waiver program, as implemented by the FHWA.

Respondents: 50 State Departments of Transportation, the District of Columbia and Puerto Rico (Right-of-Way Department).

Frequency: This is a one-time survey.

Estimated Average Burden per

Response: 3 hours.

Estimated Total Annual Burden

Hours: 156 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.
