Worker Safety and Health Program; Suspension of Rulemaking

AGENCY: Department of Energy (DOE).

ACTION: Proposed rule; notice of suspension.

SUMMARY: DOE today gives notice of the suspension of a rulemaking under the Atomic Energy Act of 1954 to promulgate worker health and safety regulations for DOE workplaces and procedures for the assessment of civil penalties for violations of standards under those regulations. Since DOE published its notice of proposed rulemaking on December 8, 2003 (68 FR 68276), DOE has become aware that the Defense Facilities Nuclear Safety Board (DFNSB), which has safety oversight responsibility with regard to DOE nuclear facilities, has concerns with regard to the proposed regulations. The purpose of today's notice of suspension is to allow time for DOE to consult with the DFNSB in order to resolve its concerns. DOE also will consider the concerns of other interested stakeholders as appropriate. Consistent with past practice, if DOE receives any significant communications from these other interested stakeholders yielding information not already in the comments that DOE has received, it will add those communications (or in the case of significant oral exchanges, memoranda summarizing those exchanges) to the public comment file in the DOE Freedom of Information Reading Room. The suspension will continue pending further notice by DOE.

[Docket No. 2003-CE-40-AD]

RIN 2120-AA64

Airworthiness Directives; Cessna Aircraft Company 120, 140, 140A, 150, F150, 170, 172, F172, FR172, P172D, 175, 177, 180, 182, 185, A185E, 190, 195, 206, P206, U206, TP206, TU206, 207, T207, 210, T210, 336, 337, and T337 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (NPRM); reopening of the comment period.

SUMMARY: The FAA proposes to revise an earlier proposed airworthiness directive (AD) to supersede AD 86-26-04 that applies to certain Cessna Aircraft Company (Cessna) 120, 140, 140A, 150, F150, 170, 172, F172, FR172, P172D, 175, 177, 180, 182, 185, A185E, 190, 195, 205A, 206, P206, P206E, TP206A, TU206, TU206E, U206, U206E, 207, T207, 210, T210, 336, 337, and T337 series airplanes. The earlier NPRM proposed to retain the actions of AD 86-26-04, add additional airplanes to the applicability section, and incorporated revised manufacturer service information. This proposed AD is the result of the FAA inadvertently omitting 10 affected airplane serial numbers for Model TU206D airplanes from the applicability section of the earlier NPRM. This proposed AD would retain the actions of earlier NPRM and add additional airplanes to the applicability section of this proposed AD. Since these actions impose an additional burden over that proposed in the earlier NPRM, we are reopening the comment period to allow the public the chance to comment on these additional actions.

DATES: We must receive any comments on this proposed AD by April 9, 2004.
