

record of each client served and submitted to the CoC central server at least once annually for purposes of unduplication and data analysis. Domestic violence providers may also choose to adopt a delayed data entry protocol whereby client records are not entered into the HMIS system until a set period of time after exit.

CoC representatives are instructed to meet with domestic violence providers to develop and implement a method by which the CoC can unduplicate data across all providers in the HMIS. HUD fully supports alternative methods of participation by domestic violence providers including those that incorporate technological or administrative solutions that adequately protect data and allow for an accurate unduplicated local count of homeless persons and analysis of homeless data to meet the goals of the Congressional directive.
