

of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

US SPECS of Aberdeen, Maryland (Registered Importer 03-321) has petitioned NHTSA to decide whether 2003-2004 CFMOTO CF125T-2 motorcycles that were not originally manufactured to conform to all applicable Federal motor vehicle safety standards are eligible for importation into the United States. U.S. SPECS contends that these vehicles are eligible for importation under 49 U.S.C. 30141(a)(1)(B) because they have safety features that comply with, or are capable of being altered to comply with, all applicable Federal motor vehicle safety standards.

Specifically, the petitioner claims that 2003-2004 CFMOTO CF125T-2 motorcycles have safety features that comply with Standard Nos. 111 *Rearview Mirrors*, 119 *New Pneumatic Tires for Vehicles other than Passenger Cars*, and 122 *Motorcycle Brake Systems*.

The petitioner claims that the vehicles are assigned vehicle identification numbers that conform to the requirements of 49 CFR part 565.

The petitioner also contends that the vehicles are capable of being altered to meet the following standards, in the manner indicated below:

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: (a) Installation of a DOT compliant headlamp system assembly; (b) installation of red rear side reflectors and amber front side reflectors that conform to the requirements of the standard. The petitioner states that the vehicles are already equipped with a tail lamp system, a stop lamp system, a white license plate lamp, a red rear

reflector, and front and rear turn signals that conform to the requirements of the standard.

Standard No. 120 *Tire Selection and Rims for Vehicles other than Passenger Cars*: Installation of a tire information placard.

Standard No. 123 *Motorcycle Controls and Displays*: (a) Inscription of the appropriate symbol on the supplemental stop engine control mounted on the right handlebar; (b) modification of the speedometer to read in miles per hour. The petitioner states that other controls and displays on the vehicles conform to the requirements of the standard.

Comments should refer to the docket number and be submitted to: Docket Management, Room PL-401, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.
