SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to extend the current OMB clearance for the Survey of Plant Capacity Utilization. The survey is conducted annually collecting data for fourth quarter operations. The survey also collects data on work patterns by shift.

These data include hours in operation, production workers, and plant hours worked. The resulting estimates are used in measuring inflationary pressures, capital flows, production indexes and analyzing and forecasting economic and industrial trends. The survey results are primarily used by the Federal Reserve Board, Federal Emergency Management Agency, and the Department of Defense.

II. Method of Collection

The Census Bureau will use the mail out/mail back survey forms to collect the data. Companies will be asked to respond within 30 days of the initial mailing.
