

MAINTENANCE WORK

A LIFE OR DEATH EXPERIENCE

EACH YEAR, MINERS DOING MAINTENANCE WORK ARE SEVERELY INJURED OR KILLED FROM A WIDE VARIETY OF HAZARDS, INCLUDING ELECTRICAL SHOCK, INADVERTENT MOVEMENT OF MACHINERY OR EQUIPMENT, AND FALLING OFF PLATFORMS OR RAISED AREAS.

BEST PRACTICES

- **Establish safe work procedures, incorporating manufacturer's recommendations, to assure that workers are not exposed to hazards when performing maintenance or repair.**
- **Ensure that all workers are trained in and follow established safe work procedures.**
- **Prior to beginning work, clear the area of trip and fall hazards.**
- **Provide safe access to all work areas.**
- **Lock and tag electrical equipment and secure mobile equipment against movement prior to repair work.**
- **Use appropriate fall protection where there is a danger of falling.**
- **Stay focused for your own safety and for the safety of your fellow workers.**

SAFETY IS A VALUE
