SUPPLEMENTARY INFORMATION:

Title: Importation of Fruits and Vegetables.

OMB Number: 0579-0128.

Type of Request: Extension of approval of an information collection.

Abstract: The United States Department of Agriculture (USDA) is responsible for preventing plant pests from entering the United States and controlling and eradicating plant pests in the United States. The Plant Protection Act authorizes the Department to carry out this mission. The Plant Protection and Quarantine (PPQ) program of USDA's Animal and Plant Health Inspection Service is responsible for implementing the regulations that carry out the intent of this Act. The regulations in "Subpart—Fruits and Vegetables" (7 CFR 319.56 through 319.56-8) prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests,

including fruit flies, that are new to or not widely distributed within the United States.

The regulations in § 319.56-2w allow papayas to be imported into the continental United States, Alaska, Puerto Rico, and the U.S. Virgin Islands from certain regions of Brazil, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama under specified conditions. Allowing papayas to be imported necessitates the use of certain information collection activities, including completing phytosanitary inspection certificates, maintaining fruit fly monitoring records, and marking the cartons.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.002 hours per response.

Respondents: Papaya producers and plant health officials in Brazil, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

Estimated annual number of respondents: 50.

Estimated annual number of responses per respondent: 10.

Estimated annual number of responses: 500.

Estimated total annual burden on respondents: 501 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 7th day of July 2004.

W. Ron DeHaven,

Administrator, Animal and Plant Health Inspection Service.
