SUPPLEMENTARY INFORMATION: On January 16, 2004, Secretary of Commerce Donald L. Evans issued "Manufacturing in America, A Comprehensive Strategy to Address the Challenges to U.S. Manufacturers". This report identifies the major economic, commercial and regulatory challenges facing the manufacturing sector, and recommends a number of steps that the Administration and the Congress could take to help strengthen the sector's ability to compete in the global market place and create jobs in the United States.

As part of this effort, the Department of Commerce recently established an Unfair Trade Practices Task Force within Import Administration to pursue the elimination of foreign unfair trade practices that prejudice or adversely affect U.S. commercial interests. To assist the Task Force in formulating its initial priorities, the Department is asking the public and representatives of the manufacturing sector to identify those unfair trade practices of greatest concern and impact. The Department is interested in receiving comments on all types of foreign unfair trade practices, including those practices which currently may not be subject to specific or adequate trade disciplines, as well as comments on the underlying market distortions that may have contributed to or resulted from the practice in question. Where appropriate, the Department also welcomes any suggestions on the most effective ways in which the Task Force can assist in addressing the particular unfair trade practices identified.

James J. Jochum,

Assistant Secretary for Import Administration.

SUPPLEMENTARY INFORMATION:

I. Abstract

United States participation in the Inter-American Tropical Tuna Commission (IATTC) results in certain recordkeeping requirements for U.S. fishermen who fish in the IATTC's area of management responsibility. These fishermen must maintain a log of all operations conducted from the fishing vessel, including the date, noon position, and the tonnage of fish aboard the vessel, by species. The logbook form provided by the IATTC is universally used by U.S. fishermen to meet this recordkeeping requirement, as permitted by the regulations. The information in the logbooks includes areas and times of operation and catch and effort by area. Logbook data are used in stock assessments and other research concerning the fishery. If the data were not collected or if erroneous

data were provided, the IATTC assessments would likely be incorrect and there would be an increased risk of overfishing or inadequate management of the fishery.

II. Method of Collection

Vessel operators maintain bridge logs on a daily basis, and the forms are either mailed to the IATTC or to NMFS at the completion of each trip. The data are processed and maintained as confidential by the IATTC.

III. Data

OMB Number: 0648-0148.

Form Number: None.

Type of Review: Regular submission.

Affected Public: Individuals or households, business or other for-profit organizations.

Estimated Number of Respondents: 20.

Estimated Time Per Response: 5 minutes.

Estimated Total Annual Burden Hours: 129.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 21, 2004.
