An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: NESHAP for Petroleum Refineries (40 CFR part 63, subpart CC) (Renewal).

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) From Petroleum Refineries, published at 40 CFR part 63, subpart CC, were proposed on July 15, 1994, and promulgated on August 18, 1995. These

regulations apply to the following existing and new petroleum refining process units and emission points located at refineries that are major sources of HAPs: miscellaneous process vents, storage vessels, wastewater streams and treatment operations, equipment leaks, gasoline loading racks, and marine vessel loading operations. These regulations also apply to storage vessels and equipment leaks associated with bulk gasoline terminals or pipeline breakout stations that are related to an affected petroleum refinery. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart CC.

Respondents are required to submit one-time reports of start of construction, anticipated and actual start-up dates, and physical or operational changes to existing facilities. In addition, respondents must submit three types of reports: (1) Notification of Compliance Status, (2) Periodic Reports, and (3) Other event triggered reports. The Notification of Compliance Status is submitted to provide the information necessary to demonstrate that compliance has been achieved. The Periodic Reports provide information on monitored control device parameters when they are outside of established ranges and information on instances where inspections revealed problems. In addition, respondents are required to comply with the recordkeeping and reporting requirements contained in the following rules: either 40 CFR part 61, subpart VV or 40 CFR part 63, subpart H for equipment leaks (which include an initial report and semiannual summaries of leak detection and repair); 40 CFR part 61, subpart FF for wastewater operations; portions of 40 CFR part 63, subpart R for gasoline loading racks; and 40 CFR part 63, subpart Y for marine tank vessel loading operations. All records are to be maintained at the facility for at least 5 years.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 839 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain,

or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Petroleum refineries that are major sources of HAP emissions.

Estimated Number of Respondents: 134.

Frequency of Response: Annual, Semiannual, On Occasion, Quarterly.

Estimated Total Annual Hour Burden: 410,054 hours.

Estimated Total Annual Costs: \$26,163,236, which includes \$0 annual capital/startup costs, \$0 annual O&M costs, and \$26,163,236 annual labor costs.

Changes in the Estimates: There is a decrease of 59,376 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This adjustment decrease in burden is due to several factors, including: a decrease in the number of respondents, the removal of capital/startup costs resulting from performance tests, and revisions to the approach to calculating costs for newly subject facilities.

Dated: December 14, 2004.

Oscar Morales,

Director, Collection Strategies Division.

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 98-98; DA 04-3678]

Parties Asked To Refresh the Record Regarding a Petition by the New York State Public Service Commission Seeking Broad Delegated Authority To Make Area Code Changes Outside the Context of Area Code Relief Planning

AGENCY: Federal Communications Commission.

ACTION: Notice; solicitation of comments.

SUMMARY: The Commission invites New York State Public Service Commission (NYPSC) to update the record pertaining to its petition seeking delegated authority to make area code changes outside the context of area code relief planning and invites interested parties to submit pleadings pertaining to the NYPSC petition.

DATES: Comments are due on or before January 4, 2005. Reply Comments are due on or before January 11, 2005.

ADDRESSES: Parties who choose to file by paper must file an original and four copies of each filing. All filings must be

sent to the Commission's Secretary, Marlene H. Dortch, Office of the Secretary, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554. See

SUPPLEMENTARY INFORMATION section for where and how to file comments.

FOR FURTHER INFORMATION CONTACT: Karen Franklin, Attorney, Wireline Competition Bureau, Telecommunications Access Policy Division, (202) 418-7400 TTY: (202) 418-0484.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Public Notice released November 23, 2004 in CC Docket No. 98-98; DA 04-3678. The full text of this document is available for public inspection during regular business hours in the FCC Reference Center, Room CY-A257, 445 Twelfth Street, SW., Washington, DC 20554. Pursuant to § 1.1 of the Commission's rules, the Commission invites the NYPSC to update the record pertaining to its petition seeking delegated authority to make area code changes outside the context of area code relief planning and invites interested parties to submit pleadings pertaining to the NYPSC petition.

In the *Local Competition Second Report and Order*, the Commission delegated authority to implement new area codes to state commissions in the context of area code relief planning. The Commission noted that state commissions are uniquely positioned to understand local conditions and what effect new area codes will have on those conditions. Each state's implementation method is, however, subject to the Commission's guidelines for numbering administration. Existing Commission guidelines, which were originally enumerated in the *Ameritech Order*, state that numbering administration should: (1) Seek to facilitate entry into the communications marketplace by making numbering resources available on an efficient and timely basis; (2) not unduly favor or disadvantage any particular industry segment or group of consumers; and (3) not unduly favor one technology over another.

The NYPSC petitioned the Commission for delegated authority to make area code changes outside the context of area code relief planning. Because the passage of time and intervening developments may have rendered the record developed for this petition stale, the Wireline Competition Bureau requests that the NYPSC identify whether the pursuit of area code relief outside the context of area code relief planning remains an issue. Also, some issues raised in the petition may have
