Approval and Promulgation of Implementation Plans; Florida: Tampa Bay Area Maintenance Plan Update**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

SUMMARY: The EPA is proposing to approve the State Implementation Plan (SIP) revision submitted by the Florida Department of Environmental Protection on December 20, 2002. This SIP revision satisfies the requirement of the Clean Air Act (CAA) as amended in 1990 for the second 10-year update for the Tampa Bay area (Hillsborough and Pinellas Counties) 1-hour ozone maintenance plan. For transportation purposes, EPA is also finalizing its adequacy determination of the new Motor Vehicle Emissions Budgets (MVEBs) for the year 2015. EPA has determined that the MVEBs for the year 2015 contained in this SIP revision are adequate for transportation conformity purposes. In the Final Rules section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no significant, material, and adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

I. Background: Under section 402 of the Clean Water Act (CWA), 33 U.S.C. 1342, the EPA may issue permits allowing discharges of pollutants from point sources into waters of the United States, subject to various requirements of the CWA. These permits are known as National Pollutant Discharge Elimination System (NPDES) permits. Section 402(b) of the CWA, 33 U.S.C. 1342(b), allows states to apply to the EPA for authorization to administer their own NPDES permit programs. In 1975, the EPA approved North Dakota's application to administer the North Dakota Pollutant Discharge Elimination System (NDPDES) program.

Section 402(b) of the CWA, 33 U.S.C. 1345(c), authorizes any state desiring to administer its own industrial pretreatment program to do so in accordance with section 402 (b)(8) and (9) of the CWA, following the procedures and requirements set out in 40 CFR 403.10. On November 12, 2003, North Dakota submitted a letter to the EPA requesting that the State's original NPDES authorization be amended to include an Industrial Pretreatment program described in an accompanying application dated November 12, 2003.

II. Public Comments: A public comment period will be conducted for
