Information Collection Requests

1. **Title:** Alternative Compliance for International and Inland Navigation Rules—33 CFR Parts 81 and 89.

OMB Control Number: 1625-0019.

Summary: The information collected provides an opportunity for an owner, operator, builder, or agent of a unique vessel to present their reasons why the vessel cannot comply with existing International/Inland Navigation Rules and how alternative compliance can be achieved. If appropriate, a Certificate of Alternative Compliance is issued.

Need: Certain vessels cannot comply with the International Navigation Rules (33 U.S.C. 1601-1608) and Inland Navigation Rules (33 U.S.C. 2001-2073). The Coast Guard thus provides an opportunity for alternative compliance. However, it is not possible to determine whether alternative compliance is appropriate, or what kind of alternative procedures might be necessary, without this collection.

Respondents: Vessel owners, operators, builders and agents.

Frequency: One-time application.

Burden Estimate: The estimated burden is 180 hours a year.

2. **Title:** Various International Agreement Pollution Prevention

Certificates and Documents, and OMB Control Number: 1625-0041.

Summary: Required by the adoption of the International Convention for the Prevention of Pollution from Ships (MARPOL 73/78), these certificates and documents are evidence of compliance with this convention for U.S. vessels on international voyages. Without the proper certificates or documents, a U.S. vessel could be detained in a foreign port.

Need: Compliance with MARPOL 73/78 aids in the prevention of pollution from ships.

Respondents: Owners and operators of vessels.

Frequency: On occasion.

Burden Estimate: The estimated burden is 6,780 hours a year.

3. *Title:* Approval of Alterations to Marine Portable Tanks; Approval of Non-Specification Portable Tanks.

OMB Control Number: 1625-0062.

Summary: The information will be used to evaluate the safety of proposed alterations to marine portable tanks and non-specification portable tank designs used to transfer hazardous materials during offshore operations, e.g., drilling rigs.

Need: Approval by the Coast Guard of alterations to marine portable tanks ensures that the altered tank retains the level of safety to which it was originally designed. In addition, rules that allow for the approval of non-specification portable tanks ensure that innovation and new designs are not frustrated by the regulation.

Respondents: Owners of marine portable tanks and owners/designers of non-specification portable tanks.

Frequency: On occasion.

Burden Estimate: The estimated burden is 18 hours a year.

4. *Title:* Voyage Planning for Tank Barge Transits in the Northeast United States.

OMB Control Number: 1625-0088.

Summary: The information collection requirement for a voyage plan serves as a preventive measure and assists in ensuring the successful execution and completion of a voyage in the First Coast Guard District. This rule (33 CFR 165.100) applies to primary towing vessels engaged in towing certain tank barges carrying petroleum oil in bulk as cargo.

Need: The information for a voyage plan will provide a mechanism for assisting vessels towing tank barges to identify those specific risks, potential equipment failures, or human errors that may lead to accidents.

Respondents: Owners and operators of towing vessels.

Frequency: On occasion.

Burden Estimates: The estimated burden is 420 hours a year.

5. *Title:* Sewage and Graywater Discharge Records for Certain Cruise Vessels Operating on Alaskan Waters.

OMB Control Number: 1625-0092.

Summary: To comply with Title XIV of Public Law 106-554, 114 STAT. 2763A-315, this information collection is needed to enforce sewage and graywater discharges requirements from certain cruise ships operating on Alaskan waters.

Need: Title 33 CFR part 159 subpart E prescribes regulations governing the discharge of sewage and graywater from cruise vessels, requires sampling and testing of sewage and graywater discharges, and establishes reporting and recordkeeping requirements.

Respondents: Owners and operators of vessels.

Frequency: On occasion.

Burden Estimates: The estimated burden is 910 hours a year.

Dated: May 27, 2004.
