BILLING CODE 4910-13-P

Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Almanor Railroad (AL)

(Waiver Petition Docket Number FRA-2004-17030)

The Almanor Railroad has petitioned for a permanent waiver of compliance for one (1) locomotive, specifically Locomotive #165, from the requirements of Safety Glazing Standards, 49 CFR 223.11. Section 223.11 states, "(a) Locomotives, other than yard locomotives built or rebuilt prior to July 1, 1980 which are equipped in the forward and rearward end facing glazing locations of the locomotive cab windshield with a glazing material that meets the criteria for either portion of the impact testing required for a Type I test under the provisions of appendix A of this part, will not require the installation of certified glazing in the windshield location except to replace windshield glazing material that is broken or damaged. (b) Locomotives other than yard locomotives built or rebuilt prior to July 1, 1980 which are equipped in all locomotive cab side facing glazing locations with a glazing material that meets the criteria for either portion of the impact testing required for a Type II test under the provisions of appendix A of this part, will not require the installation of certified glazing in the side facing glazing location except to replace side facing glazing material that is broken or damaged.

The locomotive was purchased from the Lions Club in Spokane, Washington, as POVA 103, 70-Ton GE manufactured in 1956; it is now AL Locomotive #165. The Lions Club maintained a FRA waiver for safety glazing on this locomotive prior to the AL purchasing the locomotive.

The AL Railroad operates in a private yard and over 13 miles of private track to the main line junction in Plumas County.

The AL has also recently taken Locomotive #166 out of commission. This locomotive also had an FRA waiver for safety glazing in place during its tenure.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since

Dubois County Railroad (DCR)

(Waiver Petition Docket Number FRA-2004-16890)

The Dubois County Railroad has petitioned for a permanent waiver of compliance for one (1) locomotive, specifically DCRR 78, from the requirements of Safety Glazing Standards, 49 CFR 223.11. Section 223.11 states, (a) Locomotives, other than yard locomotives, built or rebuilt prior to July 1, 1980, which are equipped in the forward and rearward end facing glazing locations of the locomotive cab windshield with a glazing material that meets the criteria for either portion of the impact testing required for a Type I test under the provisions of appendix A of this part, will not require the installation of certified glazing in the windshield location except to replace windshield glazing material that is broken or damaged. The locomotive, an ALCO S-2 1,000 HP switcher manufactured in 1950, presently has safety glass in good condition, but operating without FRA approved safety glazing.

The DCR operates over 16 miles of railroad in a rural area between Huntingburg, IN and Dubois, IN, under yard limit rules for the entire 16 miles of the operation. Maximum operating speed is 10 miles per hour. The DCRR has experienced no problems with vandalism. Presently, the DCRR maintains an FRA waiver for safety glazing on locomotive DCRR 101.
