

the Importation of Various Red Delicious Table Apples, Its Variations, and Golden Delicious Apples Originating From The United States of America, Classified In Tariff item 08.08.10.01 This determination was published in the *Diario Oficial de la Federacion*, on November 2, 2006. The NAFTA Secretariat has assigned Case Number MEX-USA-2006-1904-02 to this request.

FOR FURTHER INFORMATION CONTACT:

Caratina L. Alston, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482-5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement (“Agreement”) establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent bi-national panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* (“Rules”). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the Mexican Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on November 27, 2006, requesting panel review of the final determination described above.

The Rules provide that:

(a) a Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is December 27, 2006);

(b) a Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is January 22, 2007); and

(c) the panel review shall be limited to the allegations of error of fact or law,

including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: December 12, 2006.

Caratina L. Alston,

United States Secretary, NAFTA Secretariat.

BILLING CODE 3510-GT-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket Number: 061128312-6312-01]

Precision Measurement Grants Program; Availability of Funds

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The National Institute of Standards and Technology (NIST) announces that the Precision Measurement Grants Program is soliciting applications for financial assistance for FY 2007. The Precision Measurement Grants Program is seeking proposals for significant research in the field of fundamental measurement or the determination of fundamental constants.

DATES: Abbreviated proposals must be received at the address listed below no later than 5 p.m. Eastern Standard Time on February 2, 2007. Proposals received after this deadline will be returned with no further consideration. Finalists will be selected by approximately March 23, 2007, and will be requested to submit full proposals to NIST. All full proposals, paper and electronic, must be received no later than 5 p.m. Eastern Daylight Time on May 4, 2006.

ADDRESSES: Abbreviated proposals and paper applications must be submitted to: Dr. Peter J. Mohr; Manager, NIST Precision Measurement Grants Program; National Institute of Standards and Technology; 100 Bureau Drive, Stop 8420; Gaithersburg, MD 20899-8420; E-mail: mohr@nist.gov. Electronic final proposals should be uploaded to Grants.gov.

FOR FURTHER INFORMATION CONTACT: For complete information about this program and instructions for applying by paper or electronically, read the Federal Funding Opportunity (FFO) Notice at <http://www.grants.gov>. A paper copy of the FFO may be obtained by calling (301) 975-6328. Technical

questions should be addressed to: Dr. Peter J. Mohr at the address listed in the Addresses section above, or at Tel: (301) 975-3217; E-mail: mohr@nist.gov; Web site: <http://physics.nist.gov/pmg>. Grants Administration questions should be addressed to: Grants and Agreements Management Division; National Institute of Standards and Technology; 100 Bureau Drive, Stop 1650; Gaithersburg, MD 20899-1650; Tel: (301) 975-6328. For assistance with using Grants.gov contact support@grants.gov.

SUPPLEMENTARY INFORMATION: *Catalog of Federal Domestic Assistance Name and Number:* Measurement and Engineering Research and Standards—11.609.

Program Description: The National Institute of Standards and Technology (NIST) announces that the *Precision Measurement Grants Program* is soliciting applications for financial assistance for FY 2007. The *Precision Measurement Grants Program* is seeking proposals for significant research in the field of fundamental measurement or the determination of fundamental constants. As part of its research program, since 1970 NIST has awarded Precision Measurement Grants primarily to universities and colleges so that faculty may conduct significant research in the field of fundamental measurement or the determination of fundamental constants. NIST sponsors these grants and cooperative agreements primarily to encourage basic, measurement-related research in universities and colleges and other research laboratories and to foster contacts between NIST scientists and those faculty members of academic institutions and other researchers who are actively engaged in such work. The Precision Measurement Grants are also intended to make it possible for researchers to pursue new ideas for which other sources of support may be difficult to find. There is some latitude in research topics that will be considered under the *Precision Measurement Grants Program*. The key requirement is that the proposed project is consistent with NIST's ongoing work in the field of basic measurement science.

Funding Availability: Applicants should propose multi-year projects for up to three years at no more than \$50,000 per year. NIST anticipates spending \$100,000 this year for two new grants at \$50,000 each for the first year of the research projects. NIST may award both, one, or neither of these new awards. Second and third year funding will be at the discretion of NIST, based on satisfactory performance, continuing

relevance to program objectives, and the availability of funds.

Funding for the program listed in this notice is contingent upon the availability of Fiscal Year 2007 appropriations. NIST issues this notice subject to the appropriations made available under the current continuing resolution, H.R. 5631, "Continuing Appropriations Resolution, 2007," Public Law 109-289, as amended by H.J. Res. 100, Public Law 109-369. NIST anticipates making awards for the program listed in this notice provided that funding for the program is continued beyond December 8, 2006, the expiration of the current continuing resolution.

Statutory Authority: The authority for the *Precision Measurement Grants Program* is as follows: As authorized by 15 U.S.C. 272 (b) and (c), NIST conducts directly, and supports through grants, a basic and applied research program in the general area of fundamental measurement and the determination of fundamental constants of nature.

Eligibility: Eligible applicants are institutions of higher education; hospitals; non-profit organizations; commercial organizations; State, local and Indian tribal governments; foreign governments; organizations under the jurisdiction of foreign governments; international organizations; and Federal agencies with appropriate legal authority.

Review and Selection Process: All abbreviated proposals and full applications received in response to this announcement will be reviewed to determine whether or not they are complete and responsive to the scope of the stated objectives for each program. Incomplete or non-responsive abbreviated proposals and full applications will not be reviewed for technical merit. The Program will retain one copy of each non-responsive abbreviated proposal and full application for three years for record keeping purposes. The remaining copies will be destroyed.

To simplify the proposal writing and evaluation process, the following selection procedure will be used:

All applicants must submit an abbreviated proposal (original and two signed copies), containing a description of the proposed project, including sufficient information to address the evaluation criteria, with a total length of no more than five (5) double spaced pages, to the mailing address given above in the **ADDRESSES** section. These proposals will be screened to determine whether they address the requirements outlined in this notice. Proposals that do not meet those requirements will not

be considered further. Eight independent, objective individuals, at least half of whom are NIST employees, and who are knowledgeable about the scientific areas that the program addresses will conduct a technical review of each abbreviated proposal, based on the evaluation criteria described in the Evaluation Criteria section of this notice. Each reviewer will rank all complete proposals. The proposals will then be ranked based on the average of the reviewers' rankings. If non-Federal reviewers are used, the reviewers may discuss the proposals with each other, but the ranking will be determined on an individual basis, not as a consensus.

The Chief of the Atomic Physics Division of the Physics Laboratory, the selecting official, will then select approximately four to eight finalists. In selecting finalists, the selecting official will take into consideration the results of the reviewers' evaluations, including rank, and relevance to the program objectives described above in the Program Description section. Applicants not selected as finalists will be notified in writing.

Finalists will then be asked in writing to submit full proposals in accordance with the requirements set forth in the Content and Form of Application Submission section of the FFO notice. The same independent reviewers that reviewed the abbreviated proposals will then evaluate the full proposals based on the same evaluation criteria, and the proposals will be ranked as previously described. In selecting proposals that will be recommended for funding, the selecting official will take into consideration the results of the reviewers' evaluations, including rank and relevance to the program objectives described in the Program Description section of this notice.

The final approval of selected applications and award of grants will be made by the NIST Grants Officer based on compliance with application requirements as published in this notice, compliance with applicable legal and regulatory requirements, compliance with Federal policies that best further the objectives of the Department of Commerce, and whether the recommended applicants appear to be responsible.

Applicants may be asked to modify objectives, work plans, or budgets and provide supplemental information required by the agency prior to award.

The decision of the Grants Officer is final.

Unsuccessful applicants will be notified in writing. The Program will retain one copy of each unsuccessful

application for three years for record keeping purposes. The remaining copies will be destroyed.

Evaluation Criteria: The evaluation criteria to be used in evaluating the abbreviated application proposals and full proposals are:

1. The importance of the proposed research—Does it have the potential of answering some currently pressing question or of opening up a whole new area of activity?

2. The relationship of the proposed research to NIST's ongoing work—Will it support one of NIST's current efforts to develop a new or improved fundamental measurement method or physical standard, test the basic laws of physics, or provide an improved value for a fundamental constant?

3. The feasibility of the research and the potential impact of the grant—Is it likely that significant progress can be made in a three year time period with the funds and personnel available and that the funding will enable work that would otherwise not be done with existing or potential funding?

4. The qualifications of the applicant—Does the educational and employment background and the quality of the research, based on recent publications, of the applicant indicate that there is a high probability that the proposed research will be carried out successfully?

Each of these factors is given equal weight in the evaluation process.

Cost Share Requirements: The Precision Measurement Grants Program does not require any matching funds.

The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements: The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained in the **Federal Register** notice of December 30, 2004 (69 FR 78389) is applicable to this notice. On the form SF-424, the applicant's 9-digit Dun and Bradstreet Data Universal Numbering System (DUNS) number must be entered in the Applicant Identifier block (68 FR 38402).

Collaborations with NIST Employees: All applications should include a description of any work proposed to be performed by an entity other than the applicant, and the cost of such work should ordinarily be included in the budget.

If an applicant proposes collaboration with NIST, the statement of work should include a statement of this intention, a description of the collaboration, and prominently identify the NIST employee(s) involved, if known. Any collaboration by a NIST

employee must be approved by appropriate NIST management and is at the sole discretion of NIST. Prior to beginning the merit review process, NIST will verify the approval of the proposed collaboration. Any unapproved collaboration will be stricken from the proposal prior to the merit review.

Use of NIST Intellectual Property: If the applicant anticipates using any NIST-owned intellectual property to carry out the work proposed, the applicant should identify such intellectual property. This information will be used to ensure that no NIST employee involved in the development of the intellectual property will participate in the review process for that competition. In addition, if the applicant intends to use NIST-owned intellectual property, the applicant must comply with all statutes and regulations governing the licensing of Federal government patents and inventions, described at 35 U.S.C. 200–212, 37 CFR part 401, 15 CFR 14.36, and in section B.20 of the Department of Commerce Pre-Award Notification Requirements published on December 30, 2004 (69 FR 78389). Questions about these requirements may be directed to the Counsel for NIST, 301–975–2803.

Any use of NIST-owned intellectual property by a proposer is at the sole discretion of NIST and will be negotiated on a case-by-case basis if a project is deemed meritorious. The applicant should indicate within the statement of work whether it already has a license to use such intellectual property or whether it intends to seek one.

If any inventions made in whole or in part by a NIST employee arise in the course of an award made pursuant to this notice, the United States government may retain its ownership rights in any such invention. Licensing or other disposition of NIST's rights in such inventions will be determined solely by NIST, and include the possibility of NIST putting the intellectual property into the public domain.

Collaborations Making Use of Federal Facilities: All applications should include a description of any work proposed to be performed using Federal Facilities. If an applicant proposes use of NIST facilities, the statement of work should include a statement of this intention and a description of the facilities. Any use of NIST facilities must be approved by appropriate NIST management and is at the sole discretion of NIST. Prior to beginning the merit review process, NIST will verify the availability of the facilities

and approval of the proposed usage. Any unapproved facility use will be stricken from the proposal prior to the merit review. Examples of some facilities that may be available for collaborations are listed on the NIST Technology Services Web site, <http://ts.nist.gov/>.

Initial Screening of all Applications: All applications received in response to this announcement will be reviewed to determine whether or not they are complete and responsive to the scope of the stated program objectives. Incomplete or non-responsive applications will not be reviewed for technical merit. The Program will retain one copy of each non-responsive application for three years for record keeping purposes. The remaining copies will be destroyed.

Paperwork Reduction Act: The standard forms in the application kit involve a collection of information subject to the Paperwork Reduction Act. The use of Standard Forms 424, 424A, 424B, SF–LLL, and CD–346 have been approved by OMB under the respective Control Numbers 0348–0043, 0348–0044, 0348–0040, 0348–0046, and 0605–0001. Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.

Research Projects Involving Human Subjects, Human Tissue, Data or Recordings Involving Human Subjects: Any proposal that includes research involving human subjects, human tissue, data or recordings involving human subjects must meet the requirements of the Common Rule for the Protection of Human Subjects, codified for the Department of Commerce at 15 CFR part 27. In addition, any proposal that includes research on these topics must be in compliance with any statutory requirements imposed upon the Department of Health and Human Services (DHHS) and other Federal agencies regarding these topics, all regulatory policies and guidance adopted by DHHS, FDA, and other Federal agencies on these topics, and all Presidential statements of policy on these topics.

NIST will accept the submission of human subjects protocols that have been approved by Institutional Review Boards (IRBs) possessing a current registration filed with DHHS and to be performed by institutions possessing a current, valid Federal-wide Assurance

(FWA) from DHHS. NIST will not issue a single project assurance (SPA) for any human subjects protocol proposed to NIST.

On August 9, 2001, the President announced his decision to allow Federal funds to be used for research on existing human embryonic stem cell lines as long as prior to his announcement (1) The derivation process (which commences with the removal of the inner cell mass from the blastocyst) had already been initiated and (2) the embryo from which the stem cell line was derived no longer had the possibility of development as a human being. NIST will follow guidance issued by the National Institutes of Health at <http://ohrp.osophs.dhhs.gov/humansubjects/guidance/stemcell.pdf> for funding such research.

Research Projects Involving Vertebrate Animals: Any proposal that includes research involving vertebrate animals must be in compliance with the National Research Council's "Guide for the Care and Use of Laboratory Animals" which can be obtained from National Academy Press, 2101 Constitution Avenue, NW., Washington, DC 20055. In addition, such proposals must meet the requirements of the Animal Welfare Act (7 U.S.C. 2131 *et seq.*), 9 CFR parts 1, 2, and 3, and if appropriate, 21 CFR part 58. These regulations do not apply to proposed research using pre-existing images of animals or to research plans that do not include live animals that are being cared for, euthanized, or used by the project participants to accomplish research goals, teaching, or testing. These regulations also do not apply to obtaining animal materials from commercial processors of animal products or to animal cell lines or tissues from tissue banks.

Limitation of Liability: Funding for the program listed in this notice is contingent upon the availability of Fiscal Year 2007 appropriations. NIST issues this notice subject to the appropriations made available under the current continuing resolution, H.R. 5631, "Continuing Appropriations Resolution, 2007," Public Law 109–289, as amended by H.J. Res. 100, Public Law 109–369 and H.J. Res. 102, Public Law 109–383. NIST anticipates making awards for the program listed in this notice provided that funding for the program is continued beyond February 15, 2007, the expiration of the current continuing resolution. In no event will NIST or the Department of Commerce be responsible for proposal preparation costs if these programs fail to receive funding or are cancelled because of other agency priorities. Publication of

this announcement does not oblige the agency to award any specific project or to obligate any available funds. Funding of any award under any program announced in this notice is subject to the availability of funds.

Executive Order 12866: This funding notice was determined to be not significant for purposes of Executive Order 12866.

Executive Order 13132 (Federalism): It has been determined that this notice does not contain policies with federalism implications as that term is defined in Executive Order 13132.

Executive Order 12372: Applications under this program are not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

Administrative Procedure Act/Regulatory Flexibility Act: Notice and comment are not required under the Administrative Procedure Act (5 U.S.C. 553) or any other law, for rules relating to public property, loans, grants, benefits or contracts (5 U.S.C. 553 (a)). Because notice and comment are not required under 5 U.S.C. 553, or any other law, for rules relating to public property, loans, grants, benefits or contracts (5 U.S.C. 553(a)), a Regulatory Flexibility Analysis is not required and has not been prepared for this notice, 5 U.S.C. 601 *et seq.*

Dated: December 13, 2006.

James E. Hill,

Acting Deputy Director, NIST.

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Notice of a Public Meeting of the Interim Meeting of National Conference on Weights and Measures in January 2007

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Interim Meetings of the 92nd National Conference on Weights and Measures (NCWM) will be held January 21 to 24, 2007, in Jacksonville, Florida. The majority of the meetings are open to the public but registration is required. The NCWM is an organization of weights and measures officials of the states, counties, and cities of the United States, Federal Agencies, and private sector representatives. These meetings bring together government officials and representatives of business, industry,

trade associations, and consumer organizations on subjects related to the field of weights and measures technology, administration, and enforcement. Pursuant to (15 U.S.C. 272(b)(6)), the National Institute of Standards and Technology (NIST) supports the NCWM as one of the means it uses to solicit comments and recommendations on revising or updating a variety of publications related to legal metrology. NIST participates to promote uniformity among the States in laws, regulations, methods, and testing equipment that comprise the regulatory control of commercial weighing and measuring devices and other practices used in trade and commerce. Publication of this Notice on the NCWM's behalf is undertaken as a public service; NIST does not endorse, approve, or recommend any of the proposals contained in this notice or in the publications of the NCWM mentioned below. Please see NCWM Publication 15 which contains detailed meeting agendas and schedules, registration forms and hotel reservation information at <http://www.ncwm.net>.

DATES: January 21–24, 2007.

ADDRESSES: The Omni Jacksonville, Jacksonville, Florida.

SUPPLEMENTARY INFORMATION: The following are brief descriptions of some of the significant agenda items that will be considered along with other issues at the NCWM Interim Meeting. Comments will be taken on these and other issues during several public comment sessions. At this stage, the items are proposals. This meeting also includes work sessions in which the Committees may also accept comments and where they will finalize recommendations for NCWM consideration and possible adoption at its Annual Meeting to be held July 8 to 12, 2007, at the Snowbird Resort in Salt Lake City, Utah. The Committees may withdraw or carry over items that need additional development.

The Specifications and Tolerances Committee will consider proposed amendments to NIST Handbook 44, "Specifications, Tolerances, and other Technical Requirements for Weighing and Measuring Devices (NIST Handbook 44)." Those items address weighing and measuring devices used in commercial measurement applications, that is, devices that are normally used to buy from or sell to the general public or used for determining the quantity of product sold among businesses. Issues on the agenda of the NCWM Laws and Regulations Committee relate to proposals to amend NIST Handbook 130, "Uniform Laws and Regulations in

the area of legal metrology and engine fuel quality and NIST Handbook 133 "Checking the Net Contents of Packaged Goods." This notice contains information about significant items on the NCWM Committee agendas, and several issues are not presented in this notice. As a result, the following items are not consecutively numbered.

NCWM Specifications and Tolerances Committee

The following items are proposals to amend NIST Handbook 44:

General Code

Item 310–3. Multiple Weighing and Measuring Elements with a Single Provision for Sealing: this item would require new commercial weighing and measuring devices with multiple weighing or measuring elements to be equipped with one of several means to indicate when changes are made to individual elements that affect metrological parameters.

Scales Code

Item 320–1. Zero Indication; Requirements for Markings or Indications for Other than Digital Zero Indications: This proposal would clarify the requirement's original intent for marking zero indications on scales and point-of-sale systems when there is no load on the load receiving element of a scale and where zero is represented by other than a digital zero (*e.g.*, scrolling messages, dashes *etc.*)

Item 320–5. Tare Rounding on a Multiple Range Scale: This proposal would modify indication and rounding requirements for scales which change the value of the scale division at different weight loads. The requirement will prescribe how a multi-range scale may operate to round and indicate the weight of packaging material which must not be included in the net weight of the commodity bought or sold over the device.

Item 320–9. Definitions for Tare Mechanism, Gross Weight Value, Net Weight, Net Weight Value, Tare, and Tare Weight Value: This proposal is one of several that would adopt new or modify existing definitions for terms for weight values (net, tare, and gross) indicated by a scale during a weighing transaction to reduce the possibility of misinterpretation or misapplication of requirements in either type evaluation or field applications of commercial weighing devices.

Liquid-Measuring Devices

Item 330–1. Value of Smallest Unit of Measure for Meters with Flow-Rates up to or more than 750 liters (200 gallons)
