Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

Proposed Project

School Associated Violent Death Surveillance System—Extension—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Violence Prevention (DVP), National Center for Injury Prevention and Control (NCIPC) proposes to maintain a system for the surveillance of school-associated homicides and suicides. The system will rely on existing public records and interviews with law enforcement officials and school officials. The purpose of the system is to (1) estimate the rate of school-associated violent death in the United States and (2) identify common features of school-associated violent deaths. The system will contribute to the understanding of fatal violence associated with schools, guide further research in the area, and help direct ongoing and future prevention programs.

Violence is the leading cause of death among young people, and increasingly recognized as an important public health and social issue. In 1998, over 3,500 school aged children (5 to 18 years old) in the United States died violent deaths due to suicide, homicide, and unintentional firearm injuries. The vast majority of these fatal injuries were not school associated. However, whenever a homicide or suicide occurs in or around school, it becomes a matter of particularly intense public interest and concern. NCIPC conducted the first scientific study of school-associated violent deaths during the 1992-99 academic years to establish the true extent of this highly visible problem. Despite the important role of schools as a setting for violence research and prevention interventions, relatively little scientific or systematic work has

been done to describe the nature and level of fatal violence associated with schools. Until NCIPC conducted the first nationwide investigation of violent deaths associated with schools, public health and education officials had to rely on limited local studies and estimated numbers to describe the extent of school-associated violent death.

The system will draw cases from the entire United States in attempting to capture all cases of school-associated violent deaths that have occurred. Investigators will review public records and published press reports concerning each school-associated violent death. For each identified case, investigators will also interview an investigating law enforcement official (defined as a police officer, police chief, or district attorney), and a school official (defined as a school principal, school superintendent, school counselor, school teacher, or school support staff) who are knowledgeable about the case in question. Researchers will request information on both the victim and alleged offender(s)—including demographic data, their academic and criminal records, and their relationship to one another. They will also collect data on the time and location of the death; the circumstances, motive, and method of the fatal injury; and the security and violence prevention activities in the school and community where the death occurred, before and after the fatal injury event. There are no costs to the respondents other than their time. The total estimated annualized burden hours are 70.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Number of respondents	Number of responses per respondent	Average burden/response (in hours)
School Officials	35	1	1
Police Officials	35	1	1

Dated: November 7, 2006.

Joan F. Karr,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.
