BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2006-25525; Notice 1]

Fulmer Helmets, Inc., Receipt of Petition for Decision of Inconsequential Noncompliance

Fulmer Helmets, Inc. (Fulmer) has determined that certain helmets it produced in 2001 through 2006 do not comply with S5.2 of 49 CFR 571.218, Federal Motor Vehicle Safety Standard (FMVSS) No. 218, "Motorcycle Helmets." Fulmer has filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports."

Pursuant to 49 U.S.C. 30118(d) and 30120(h), Fulmer has petitioned for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of Fulmer's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Affected are a total of approximately 32,052 helmets which Fulmer certified as complying with FMVSS No. 218. These consist of approximately 26,762 Modular Motorcycle Helmets AF-M produced between January 2002 and April 2006, and approximately 5,290 Modular Snowmobile Helmets SN-M produced between November 2001 and

November 2005. S5.2 of FMVSS No. 218, penetration, requires that "when a penetration test is conducted in accordance with S7.2, the striker shall not contact the surface of the test headform." When this test was conducted on the subject helmets, the striker contacted the surface of the test headform. Fulmer has corrected the problem that caused these errors so that they will not be repeated in future production.

Fulmer believes that the noncompliance is inconsequential to motor vehicle safety and that no corrective action is warranted. Fulmer states that it asked Harry Hurt, "a leading expert in helmet testing and motorcycle accident research * * * [whose] experience is more than 50 years," to review the test results. Fulmer further states,

[Harry Hurt's] opinion is that the noncompliance on the penetration test is inconsequential because the helmets performed exceptionally well on all impact attenuation tests. In his experience, there has never been any correlation between the penetration test and accident performance, and damage like the penetration test is never seen in crash involved motorcycle helmets.

Mr. Hurt's full statement is available in the docket.

Interested persons are invited to submit written data, views, and arguments on this petition.
