

methodologies and Risk Based Decision-Making techniques. Since the facility is currently in operation, DNV considered existing safeguards documented in the Baltimore Area Maritime Security Plans, other Coast Guard safety and security assessments, Dominion's facility security assessments, and LNG Maritime Security Workshop findings. The analysis results highlighted potential safety and security risks, determined overall risk values, and identified risk management strategies.

The Resource Needs for Safety, Security and Response section identifies public and private resources along the length of the Chesapeake Bay LNG route that may be used to prevent and/or mitigate an accidental or intentional LNG carrier casualty.

Due to the sensitive nature of the information contained in the WSA, it is classified as Sensitive Security Information (SSI) and is controlled under 49 CFR part 1520. The WSA itself is, therefore, not able to be released in its entirety to the public without a "need to know" as defined in 49 CFR 1520.5. However, the general conclusions of the WSA are presented here for your information.

Based on the research, analysis, and findings in the Cove Point WSA, DNV concluded that additional LNG vessel traffic related with the Dominion Cove Point expansion project does not pose an undue hazard to the Chesapeake Bay or to the facility/vessel interface. The assessment indicates that currently employed risk management strategies at required enforcement levels for each MARSEC level offer the necessary protection to identified safety and security risks for increased LNG tanker traffic in the Chesapeake Bay and that no additional safeguards would be necessary to manage the risk to an acceptable level.

The Coast Guard will take into consideration the results of the Cove Point WSA and public comments received on its conclusions when preparing our input to FERC for inclusion in the Final EIS. The results

will also be considered as the Coast Guard prepares a Letter of Recommendation which will identify what actions and resources are necessary to make the Chesapeake Bay suitable for increased LNG traffic to Cove Point.

Dated: January 26, 2006.

Curtis A. Springer,

Captain, U.S. Coast Guard, Commander, U.S. Coast Guard Sector Baltimore, Baltimore, Maryland.

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a proposed extension of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the information collection outlined in 44 CFR part 61, as it pertains to application for National Flood Insurance Program (NFIP) insurance.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP) is authorized by Public Law 90-448 (1968) and expanded by Public Law 93-234 (1973). The National Flood Insurance Act of 1968 requires that the Federal Emergency Management Agency

(FEMA) provided flood insurance at full actuarial rates reflecting the complete flood risk to structures built or substantially improved on or after the effective date for the initial Flood Insurance Rate Map (FIRM) for the community, or after December 31, 1974, whichever is later, so that the risks associated with buildings in flood-prone areas are borne by those located in such areas and not by the taxpayers at large. In accordance with Public Law 93-234, the purchase of flood insurance is mandatory when Federal or federally related financial assistance is being provided for acquisition or construction of buildings located, or to be located, within FEMA-identified special flood hazard areas of communities that are participating in the NFIP.
